

CONTENTS OF NEXT ISSUE

PMM Vol. 32, No. 4, 1968

- M. Ia. KUSHUL'**: Motion of a gyroscope with flexible axis under the action of the force of gravity and elastic constraints for small angles of nutation and the stability of its vertical rotation
- A. F. KLEIMENOV**: Vibrations in autonomous systems with lag, close to the systems of Liapunov
- N. N. KRASOVSKII and A. I. SUBBOTIN**: The problem of approach of controlled objects
- F. L. CHERNOUS'KO**: Minimax problem of a one-time correction in the presence of measurement errors
- A. N. KRAIKO and A. A. OSIPOV**: On the solution of variational problems of supersonic gas flows with different particles
- Iu. B. PONOMARENKO**: On the stability of plane Couette flow
- P. P. KORIAVOV and Iu. N. PAVLOVSKII**: Self-modeling problems of mixing of a viscous fluid
- G. I. BYKOVTSSEV, D.D. IVLEV and Iu. M. MIASNIANKIN**: On kinematical relations on the surfaces of sliding in ideal rigid-plastic bodies
- N. Kh. ARUTIUNIAN**: The contact problem for a half-plane with an elastic inclusion
- A. A. KHRAPKOV**: The first fundamental problem for a piecewise-homogeneous plane with a cut perpendicular to the line of separation
- A. G. FOKIN and T. D. SHERMERGOR**: Correlational functions of an elastic field of quasi-isotropic solid bodies
- V. M. ALEKSANDROV**: Asymptotic methods in contact problems of the theory of elasticity
- A. L. GOL'DENVEIZER**: Methods of justification and refinement of the theory of shells (a survey of recent results)
- E. M. KOROLEVA**: Stability of a cylindrical shell in the presence of a bending state of stress
- N. A. ALFUTOV and L. I. BALABUKH**: The energy criterion of stability of elastic bodies which does not require the determination of the initial state of stress and deformation
- B. I. SMETANIN**: On a mixed problem of the theory of elasticity for a wedge
- V. V. KOPASENKO**: The contact problem of the theory of elasticity for a half-strip
- L. S. SRUBSHCHIK and V. A. TRENIGIN**: On buckling of elastic plates
- B. N. SKRIABIN**: On a dynamic system with a discontinuous characteristic
- L. D. AKULENKO**: On steady rotational-vibrational motions in a system whose undisturbed motion is stable

- A. P. MARKEEV: On stability of a canonical system with two degrees of freedom in the presence of resonance
- E. G. AL'BREKHT and G.S. SHELEMENT'EV: On the influence of a nonholonomic constraint on the stabilization of a mechanical system
- Nguen VAN D'EP: On the equations of a boundary layer of a fluid with couple stresses
- Iu. K. BRATUKHIN and L. N. MAURIN: Equilibrium shapes of a rotating liquid cylinder
- L. Ia. KOSACHEVSKII: Magnetosonic waves in two-component media
- A. G. KULIKOVSKII and S. A. REGIRER: On stability and evolution of distribution of electric current in a medium with nonlinear conductivity
- V. N. RUBANOVSKII: On some possible motions of a heavy solid body in a fluid
