

CONTENTS OF NEXT ISSUE

PMM Vol. 33, №6, 1969

- V. V. RUMIANTSEV : On the motion and stability of an elastic body with a cavity containing fluid
- R. V. BIRIKH, G. Z. GERSHUNI, E. M. ZHUKHOVITSKII and R. N. RUDAKOV : Stability of stationary convective motion of a fluid with a longitudinal temperature gradient
- N. N. BAUTIN : On approximations and the roughness of the parameter space of a dynamical system
- Iu. V. KOZHEVNIKOV : On the optimization of processes with a declining argument
- A. L. GOL'DENVEIZER : Boundary layer and its interaction with the internal state of stress of an elastic thin shell
- V. F. BONDAREVA : On the effect of an axisymmetric normal loading on an elastic sphere
- V. A. BABESHKO : On a type of integral equations occurring in contact problems of the theory of elasticity
- A. S. SOLOV'EV : On an integral equation and its applications to contact problems of the theory of elasticity, taking into account the forces of friction and cohesion
- G. A. GRINBERG : On temperature or concentration fields, formed within an infinite or finite region by moving surfaces on which the time dependence of the temperature or the concentration are prescribed
- N. N. LEBEDEV and I. P. SKAL'SKAIA : On the solution of a class of dual integral equations of the theory of elasticity and mathematical physics, associated with the Mehler-Fock transformation
- V. P. DEMUTSKII and R. V. POLOVIN : On magnetoplastic flow
- S. L. KAMENOMOSTSKAIA : On the equation of elasto-plastic regime of filtration
- V. V. MUSATOV : Nonsteady waves in a rotating channel of constant depth
- S. PANCHEV : Selfsimilar spectra of decaying (damped) turbulence for large Reynolds and Péclet numbers
- V. D. BONDAR' : On the compatibility equations of deformations and stresses
- V. G. NEMIROV : On fundamental solutions in the theory of a circular cylindrical shell
- B. I. CHESHANKOV : Resonance oscillations of a special double pendulum
- R. S. SULIKASHVILI : Some stationary motions of gravitational gyrostat and spheroid and their stability
- V. G. VERETENNIKOV : On the construction of solutions of quasilinear nonautonomous systems in resonance cases
- S. Ia. STEPANOV : On the boundaries of libration of a satellite on a circular orbit under the action of perturbing potential forces
- E. DAL'BERG : Remark on the Note by S. K. Persidskii "Study of stability of the solution of some nonlinear systems of differential equations". PMM Vol. 32, №6, pp. 1122-1125, 1968
