

CONTENTS OF NEXT ISSUE

PMM Vol. 35, №3, 1971

- N. N. BARABANOVA and A. I. SUBBOTIN : On classes of strategies in differential games of encounter evasion
- N. N. GOLUB' : Optimization of behavior of distributed systems with random properties
- L. M. ZUBOV : Variational principles of the nonlinear theory of elasticity
- V. B. NEMTSOV : On a statistical theory of viscoelastic properties of asymmetric media
- IL. ILIEV : Classification of linear integrals of a holonomic mechanical system with two degrees of freedom
- L. G. KHAZIN : On stability of Hamiltonian systems in the presence of resonances
- T. D. SHERMERGOR : Relations between the components of the correlation functions of an elastic field
- N. V. KHARKOVA : On the lower part of the spectrum of free axially-symmetric oscillations of a thin elastic shell of revolution
- R. D. MINDLIN : Electromechanical vibrations of centro-symmetric cubic crystal plates
- R. I. NIGMATULIN : Microscale flows and surface effects in hydromechanics of multi-phase media
- Iu. A. BUEVICH : Successive approximations in hydromechanics of dispersive systems
- A. F. SIDOROV : On destruction of potential gas flows adjoining a region of rest
- L. I. MOGILEVICH and G. P. SHINDIAPIN : On nonlinear diffraction of weak shock waves
- A. A. OREL : Variational problems for plane transonic gas flows
- K. A. LUR'E : Optimal distribution of the specific drag tensor of the active substance in a magnetohydrodynamic channel (case of nonlocal variations)
- V. P. PILATOVSKII : Solution of some problems of hydromechanics of filtration of a homogeneous liquid in a thin layer with macro-cracks
- A. V. BELOKON' and R. A. GRUNTFEST : Motion of a parabolic contour on the surface of a heavy ideal liquid of finite depth
- E. G. SHIFRIN : Study of axisymmetric transonic flows with the aid of a special hodograph plane
- S. I. TARLINSKII : Approximation of optimal game strategies by continuous functions
