

CONTENTS OF NEXT ISSUE

PMM Vol. 36, №3, 1972

- A. N. VEISSENBERG : On possible types of critical cases for Lagrange's equations of the second kind
- A. S. OZIRANER : On some theorems of Liapunov's second method
- II. ILIEV and Khr. SEMERDZHIEV : Connection between first integrals of a nonholonomic mechanical system and a corresponding system, freed of constraints
- N. N. BAUTIN : Qualitative study of a dynamical system
- V. S. PATSKO : Conditions of evasion in a linear differential game of second order
- A. F. SIDOROV : Method of solution of some boundary value problems for nonlinear equations of hyperbolic type and propagation of weak shock waves
- L. I. RUBINA : On propagation of weak discontinuities for quasilinear systems
- N. N. GORBANEV : On some classes of quasi-stationary flows of an ideal, incompressible fluid
- V. I. IUDOVICH : Investigation of auto-oscillations of a continuous medium, occurring during loss of stability of a stationary regime
- D. A. SILAEV : Time-periodic solutions of a system of boundary layer equations
- V. N. SAMOKHIN : On formation of a plane-parallel symmetric boundary layer under conditions of sudden initiation of motion
- Iu. P. GUPALO and Iu. S. RIAZANTSEV : Diffusion to a particle in the case of shear flow of a viscous fluid. Approximation of a diffusive boundary layer
- Iu. A. BUEVICH and V. G. MARKOV : Rheology of concentrated fluid mixtures with small particles. Parameters of phase interaction
- V. M. ALEKSANDROV and M. I. CHEBAKOV : Mixed problems of mechanics of continuous media, related to the integral transforms of Hankel and Mehler-Fok
- V. G. GROMOV : Method of perturbations in the boundary value problem of thermoviscoelasticity
- V. V. DUROV and D. D. IVLEV : On impression of a thin, rigid body into a plastic medium with hardening
- G. L. BROVKO and V. S. LENSII : On convergence of the method of homogeneous linear approximations in problems of the theory of plasticity of nonhomogeneous bodies
- Iu. K. ENGEL'BREKHT : Estimation of time of occurrence of discontinuities of the solution of the boundary value problem for a hyperbolic quasi-linear system of second order
- N. I. KRUPNOVA and S. N. SHIMANOV : Criterion of stability of linear systems with variable coefficients and time lag
- G. N. MIL'SHTEIN : Mean-square stability of linear systems, subjected to the action of Markov chains
- M. V. LEVIT : Algebraic criterion of stochastic stability of linear systems with parametric excitation of correlated white noises
- B. N. SKRIABIN : On the equation of phase self-adjustment of frequency with delay and a rectangular characteristic of a phase detector
- V. A. BUCHIN : Problem of an electrohydrodynamic probe which does not disturb the distribution of current density and volume charge

CONTENTS OF NEXT ISSUE (CONT)...

- V.K. BODULINSKII, Iu. MEDVEDEV and B.M. STEPANOV : Exact solution of the problem of an infinitely conducting sphere with an arbitrary varying radius in an external magnetic field
- V.P. KANDIDOV and E.P. KHLIBOV : On the convergence of the method of finite elements in the analysis of membrane dynamics
- V.P. TEN : Torsional vibrations of a viscoelastic half-space
