

CONTENTS OF NEXT ISSUE

PMM Vol. 39, № 1, 1975

- A. A. CHIKRII : Nonlinear problem of encounter-evasion with a terminal set of complex structure
- P. B. GUSIATNIKOV : Escape of nonlinear objects of different type with integral constraints of control
- V. V. KOZLOV : Dynamic systems occurring on the invariant tori of the Kowalewska problem
- Iu. M. -L. KOSTIUKOVSKII and A. I. NEFELOV : On quantitative estimates of indeterminacy of motion
- A. L. KUNITSYN : On stability of periodic motions in the case of resonance
- V. P. SKRIPNIK : On stability of nonlinear systems of the neutral type
- V. M. LAKHADANOV : On stabilization of potential systems
- V. D. FURASOV : On Liapunov's vector functions and stabilization of interconnected systems
- A. L. NI and O. S. RYZHOV : Two-dimensional flows of a relaxing mixture and the structure of weak shock waves
- V. V. TRET'YAKOV : New analytical solutions of the wave equation and the problem of diffraction
- V. A. VYSLOUKH, V. P. KANDIDOV and S. S. CHESNOKOV : A model of an elastic plate made of finite elements in supersonic flow
- G. Ia. GALIN and A. G. KULIKOVSKII : On stability of flows occurring in disintegrating arbitrary discontinuities
- A. A. MIRONOV : On the problem of optimization of the shape of a body in a viscous fluid
- D. A. POPOV : Problem with discontinuous boundary conditions and the approximation of a diffusive boundary layer
- Iu. P. GUPALO, Iu. S. RIAZANTSEV and Iu. A. SERGEEV : Nonstationary mass exchange of a bubble with a medium in a reactor with a quasi-scalded layer
- A. S. POPEL', S. A. REGIRER and N. Kh. SHADRINA : On the equations of kinetics of aggregation processes in suspensions
- V. V. STRUMINSKII : On laminar steady flow of gas mixtures in pipes and channels
- B. A. KUDRIAVTSEV, V. Z. PARTON and V. I. RAKITIN : Fracture mechanics of piezoelectric materials. Rectilinear tunnel crack in the boundary of a conductor
- II. ILIEV : On first integrals of a nonholonomic mechanical system
- B. I. CHESHANKOV : Multi-frequency resonance vibration under external disturbances
- L. KHATVANI : On some indications of stability with two Liapunov functions
- E. P. SMIRNOVA : Motion of a fluid with large viscosity in a rotating torus
- G. A. SHAPOSHNIKOVA : Shock adiabat in magnetized nonconducting media
- O. G. TAITTS : Longitudinal flow past a thin body of revolution with a free boundary
- A. V. VELIKOTNYI and B. I. SMETANIN : On the problem of steady oscillations of a plane with a crack
