

## CONTENTS OF NEXT ISSUE

PMM Vol. 41, № 1, 1977

- S. A. CHIGIR': On an alternative in a differential game of evasion with incomplete information
- A. S. BRATUS': Asymptotic solutions of some problems of probabilistic optimal control
- A. G. SOKOL'SKII: On stability of autonomous Hamiltonian systems with two degrees of freedom for resonance of first order
- A. G. TSYPKIN: On a model of a continuous medium taking account of electromagnetic effects
- I. M. RUTKEVICH: Continuum equations of electrodynamics of conducting suspensions moving in a magnetic field
- V. A. NALETOVA and G. A. SHAPOSHNIKOVA: Interaction of discontinuities in magnetized, ideally-conducting incompressible media
- V. G. BUTOV, I. M. VASENIN and A. I. SHELUKHA: Application of the methods of nonlinear programming to the solution of variational problems of gasdynamics
- E. D. TERENT'EV: On hypersonic axisymmetric flow with constant momentum
- V. I. ZHUK: Some asymptotic properties of microparameters of a rarified gas for an expansion in vacuum
- A. G. PETROV: Lagrange function for vortex motions and dynamics of deformed drops
- A. I. SUSLOV: On Stephan's problem occurring in the theory of powder burning
- A. L. NI and O. S. RYZHOV: Limiting expressions for intermediate sound speeds in non-equilibrium flows with an arbitrary number of chemical reactions
- V. I. ELIZAROV and T. K. SIRAZETDINOV: Optimum control by flow of non-Newtonian fluid between rotating cylinders
- M. I. GUSEIN-ZADE: On the plane problem of the theory of elasticity for a half strip
- V. A. CHURILOV: On the action of normal loading moving with constant speed on the boundary of an elastic half space
- A. G. FOKIN: Effective elastic moduli of nonhomogeneous media in the case of potential and bivortex tensor fields
- Iu. A. BOGAN and Iu. V. NEMIROVSKII: Plane problem of the theory of elasticity for a medium with two families of equistressed fiber reinforcements
- S. P. BUDANOV and B. I. ORLOV: Free vibrations of a rectangular parallelepiped
- V. A. BABESHKO, I. I. VOROVICH and M. G. SELEZNEV: Vibrations of a stamp on a two-layered foundation
- V. N. BELYKH and Iu. S. CHERTKOV: On complex structures of nonautonomous periodic piecewise linear systems on a cylinder
- P. M. BURLAKA: Mutation-free motions in the solutions of a problem of motion of a gyrostat
- Iu. V. BARKIN and V. G. DEMIN: On periodic motions of a rigid body with a fixed point in a Newtonian field
- B. M. BULAKH: On the theory of axisymmetric supersonic gas flow past a sharpened body of revolution
- O. D. GRIGOR'EV: On limitations imposed by a condition of positiveness of dissipation on the boundary conditions for plane deformation of a rigid plastic body
