

## CONTENTS OF NEXT ISSUE

PMM Vol. 41, № 3, 1977

- L. V. PETUKHOV : Optimal control by processes described by equations of the hyperbolic type
- G. P. CHEREPANOV : Invariant  $\Gamma$ -integrals and some of their applications in mechanics
- A. S. OZIRANER : On the stability of motion in linear approximation
- A. L. KUNITSYN and S. V. MEDVEDEV : On stability in the presence of several resonances
- G. S. IUDAEV : On stability of stochastic differential equations
- B. I. ANAN'EV : Minimax quadratic problem of correction of motion
- V. B. KOLMANOVSKII and T. L. MAIZENBERG : Optimal estimates of the state of the system and some problems of guidance using equations with aftereffect
- Iu. B. PONOMARENKO : On combination resonances in hydrodynamics
- V. P. SHIDLOVSKII : Flow structure of a viscous fluid near the edge of a rotating disk
- O. V. VOINOV : Nonstationary nonlinear capillary wave in a viscous fluid layer
- V. S. BERMAN : A class of solutions of nonstationary equations of the theory of combustion of condensed substances
- V. M. ALEKSANDROV and M. I. CHEBAKOV : The method of dual series in Bessel functions in mixed problems of the theory of elasticity for a circular plate
- V. B. GLAGOVSKII and B. M. NULLER : Torsion of finite elastic cylinders, welded to circular plates of cylindrical shells
- Iu. A. AMENZADE : The center of flexure of a hollow composite cantilever
- M. A. IL'GAMOV : On the conditions at the contact surface of an elastic shell and an ideal fluid in Lagrangian representation
- M. Iu. ZHUKOV and L. S. SRUBSHCHIK : Stability of thin asymmetric piecewise convex elastic shells
- L. A. OSTROVSKII and A. M. SUTIN : Nonlinear elastic waves in bars
- P. P. MOSOLV and V. P. MIASNIKOV : Asymptotic theory of rigid-plastic shells
- E. A. VAGNER : On a family of periodic solutions of motions of a heavy rigid body with a fixed point
- Kh. M. IAKH'IA : On periodic motions of a rigid body with a fixed point close to stationary ones
- Iu. V. BARKIN and V. E. IEVLEV : Periodic motions of a rigid body with a fixed point in the field of attraction by two centers
- M. KH. KHASANOVA : Qualitative studies of properties of motion of a satellite of a spheroidal planet
- N. G. APYKHTIN, A. A. PIONTKOVSKII and T. M. CHIKHLADZE : On stabilization of translational motion of a guided rigid body
- L. K. KUZ'MINA : On stability of solutions of some systems of differential equations with derivatives having a small parameter
- V. Ia. GLIZER and M. G. DMITRIEV : On continuity of solution of the problem of analytic construction of a control with singular disturbances
