

## CONTENTS OF NEXT ISSUE

PMM Vol. 41 № 6, 1977

- L. I. SEDOV: On a natural theory of continuous media
- M. N. NIKOLAEV: On the solution of the plane problem of sliding on a perturbed surface of a heavy liquid
- V. L. BERDICHEVSKII: On averaging of periodic structures
- O. S. RYZHOV and E. D. THERENT'EV: On nonstationary boundary layer with self-induced pressure
- S. N. KAZAIKIN, G. A. TIRSKII and Iu. D. SHEVELEV: Spatial boundary layer in an ionized gas in chemical equilibrium
- V. V. GOGOSOV, V. M. KOROVIN and V. A. POLIANSKII: Study of the structure of an electrohydrodynamic shock wave using the complete equation of motion for the charged component instead of Ohm's law
- K. A. BEZHANOV: Nonregular interaction of a moving shock wave with a tangential discontinuity
- A. L. NI: Propagation of weak shock waves in media with an arbitrary number of chemical reactions
- M. M. VASIL'EV: On the determination of the flow field in a region around a body in a flow with small Reynolds number
- A. L. GOL'DENVEIZER: Approximate methods of studying free vibrations of thin shells
- A. G. FOKIN: The method of norm changing in the case of an unbounded medium in the absence of external forces
- N. P. BESTUZHEVA and A. V. CHIGAREV: On the application of the Markov approximation in the dynamics of stochastic media
- A. I. SAICHEV: On statistics of longitudinal nonlinear random waves in an elastic body
- V. E. ZHIROV: Electro-elastic equilibrium of a piezoceramic plate
- V. A. KONDRASHEV and A. G. KULIKOVSKII: On boundaries of the growth region of multi-dimensional perturbations of unstable states
- V. P. SHIDLOVSKII: Effect of the influence of the counterpressure in a one-dimensional unsteady flow of a viscous gas
- V. A. EREMENKO: On the structure of the flow field in the vicinity of a caustic
- M. Iu. KOZMANOV: On the motion of a piston in a polytropic gas
- O. A. SINKEVICH: On the stability of nonhomogeneous stationary states in a non-equilibrium magnetized plasma
- A. M. GOLOVIN and V. E. CHIZHOV: On the analysis of the binary correlation function of a two-phase system
- A. V. SKACHENKO and A. N. SPORYKHIN: On the additivity of tensors of strain and displacements for finite elasto-plastic deformation
