

CONTENTS OF NEXT ISSUE

PMM Vol. 42, Issue 2, 1978

- M. BAIBAZAROV and A. I. SUBBOTIN: Generalized potentials in a differential game with fixed termination time
- A. V. KRIAZHIMSKII and V. I. MAKSIMOV: Approximation of linear differential-difference games
- V. A. KORNEEV and A. A. MELIKIAN: Differential-impulsive game of approach
- G. V. TOMSKII: Problems of approach-evasion in quasidynamic systems
- M. G. DMITRIEV: On a class of singularly perturbed problems of optimal control
- S. F. MOROZOV and I. P. SMIRNOV: Minimum principles in problems of optimal control of random processes
- S. V. BOLOTIN and V. V. KOZLOV: Libration in systems with many degrees of freedom
- V. S. ELFIMOV: Existence of periodic solutions of equations of motion of a rigid body close to a Lagrange gyroscope
- V. I. VOZLINSKII: On stability of bifurcation points of equilibrium
- V. I. VOROTNIKOV and V. P. PROKOP'EV: On stability of motion relative to a part of variables for linear systems
- A. S. OZIRANER: On optimal stabilization of motion relative to a part of variables
- O. S. RYZHOV and E. D. TERENT'EV: Laminar hypersonic trail past a carrying body
- A. L. BREZHNEV and I. A. CHERNOV: Construction of higher approximations in problems on special flows in plane Laval nozzles
- G. E. GERSHUNI, E. M. ZHUKHOVITSKII and S. M. IORSHINA: On convective instability of equilibrium of an inclined fluid layer with respect to spatial perturbations
- A. D. POLLANIN: On diffusional interaction of solid particles for large Péclet numbers
- B. M. MARKEEV and A. A. PLATONOV: On the solution of the two-point boundary value problem in the theory of a flowing water reactor
- A. D. CHERNYSHOV: On a heuristic method of solution of nonlinear problems of elliptic type for doubly connected regions
- B. A. GORLACH: Determination of geometric characteristics of shells of revolution satisfying the compatibility conditions for finite deformations
- Iu. A. ROSSIKHIN: On non-stationary vibrations of plates on elastic foundations
- V. S. BUDAEV: Uniqueness of solution of external problems of the theory of elastic vibrations of anisotropic media
- L. A. KIPNIS: Edge crack at the boundary of different media
- S. D. BELIAEVA: Investigation of stability of the undisturbed motion of an axisymmetric rigid body in the case of spatial motion in air of its center of mass
- Iu. V. SAVEL'EV: On the study of systems of differential equations in the vicinity of boundaries of the stability region
- B. Iu. SKOBELEV: Secondary flows in a plane channel
- E. V. TEODOROVICH: Sliding of a cylinder on viscoelastic foundation
- E. A. ZAGUSTINA and R. E. KALABA: New representation and method of solution of Fredholm integral equations
- S. NEDZHESKU-KLEZHA: A uniqueness theorem for two-sectional elastoplastic processes
