

## CONTENTS OF NEXT ISSUE

PMM Vol. 42, № 3, 1978

- V. V. RUMIANTSEV: On Hamilton's principle for non-holonomic systems
- V. V. KOZLOV: Nonexistence of single valued integrals and branching of solutions in the dynamics of rigid bodies
- V. N. SKIMEL': On the property of stiffness of motion
- M. V. MIRONOV: The method of two-sided transfer of parameters in solving boundary value problems of the theory of vibrations
- V. I. SOKOLOV: Stabilization of controllable systems by means of nonlinear guidance actions
- B. Sh. MORDUIKHOVICH: On difference approximations of systems of optimal control
- Iu. P. GUPALO, A. D. POLIANIN, P. A. PRIADKIN and Iu. S. RIAZANTSEV: On non-stationary mass transfer of a drop in viscous flow
- V. S. BERMAN: Non-stationary propagation of the combustion wave in a medium with slowly varying parameters
- V. S. KOLESOV, Iu. S. KOLESOV, A. N. KULIKOV and I. I. FEDIK: On a mathematical problem of the theory of elastic stability
- A. S. KRAVCHUK: Formulation of the problem of contact of several deformable bodies as problems of nonlinear programming
- V. M. ALEKSANDROV and N. Kh. ARUTUNIAN: Interaction of a moving elastic stamp with an elastic half-plane across a corner sheet or a thin layer of ideal fluid
- B. P. BELINSKII: Diffraction of a plane wave at a plate reinforced by a protruding stiffening rib
- A. G. ALENITSYN and S. I. CHELKAK: Resonance phenomena accompanying diffusion of a plane wave by a non-homogeneous layer and by a packet of non-homogeneous layers
- G. I. VOLOKITIN: Influence of physical and geometrical nonlinearity on the magnitude of the upper critical pressure for buckling of a hollow sphere
- V. N. SOLODOVNIKOV: Optimization of elastic shells of revolution
- M. L. BURYSHKIN: Generalized periodic problems of the theory of elasticity
- Ia. V. SHLIAPOBERSKII: Asymptotic solution of the three-dimensional problem of equilibrium of an elastic body with a cut
- V. V. PODALKOV and V. A. ROMANOV: Stress concentration at the boundary of a micro-non-homogeneous elastic half-space
- A. G. FOKIN: Statistical properties of non-homogeneous solid media. Central moment functions of material properties
- V. M. LAKHADANOV: On quadratic integrals of linear autonomous systems
- M. A. BALITNOV: On instability of the position of equilibrium of a Hamiltonian system
- D. V. LEBEDEV: On the transfer of a rigid body into the regime of steady rotation with a given orientation of the axis of rotation
- V. G. GETMANOV: Study of the optimal, with respect to high-speed, electro-magnetic correction of a gyroscope
- A. A. LIUBUSHIN: Convergence of the method of a small parameter for weakly controllable optimal systems
- I. E. ZABABAKHIN and V. A. SIMONENKO: The spherically centered compression wave
