

CONTENTS OF NEXT ISSUE

PMM Vol. 43, Issue 3, 1979

- L. I. SEDOV and A. G. TSYPKIN: On the construction of models of continuous media interacting with an electromagnetic field
- V. V. BELETSKII and D. Iu. POGORELOV: Plane resonance rotations of a satellite on an elliptical orbit
- A. P. MARKEEV: On stationary rotations of a rigid body in a periodic orbit in the vicinity of a co-linear libration point
- T. I. POGOSIAN and M. P. KHARLAMOV: Bifurcational set and integral manifolds of the problem concerning the motion of a rigid body in a linear force field
- Ia. M. GOL'TSER: Bifurcation and stability of neutral systems in the vicinity of a resonance of third order
- V. I. VOROTNIKOV: On stability of motion relative to a part of the variables for some nonlinear systems
- A. A. CHIKRII: Quasilinear problem of approach with participation of several people
- V. L. ZAK: On the problem of evasion from many pursuers
- T. R. GICHEV and A. L. DONCHEV: Convergence of the solution of the linear problem of high-speed action for singular perturbations
- V. V. KYKHTA: On finding the solution of the equation of the lifting surface
- Iu. B. RADVOGIN: Neighborhood of a plane cusp for supersonic flow
- V. V. GOGOSOV, V. A. NALETOVA and G. A. SHAPOSHNIKOVA: On construction of models of polarizable dispersive and multi-component media
- A. N. KRAIKO: On surfaces of discontinuity in a medium lacking its "proper" pressure
- S. Z. DUNIN and V. V. SURKOV: Dynamics of pore closing at the front of a shock wave
- D. I. SHERMAN: On some types of singular integral equations encountered in applications
- B. E. POBEDRIA: Some general theorems of mechanics of a deformable solid body
- D. V. GRILITSKII, A. A. EVTUSHENKO and G. T. SULIM: Stress distribution in a layer with an elastic thin inclusion
- N. I. VOROB'EVA, S. G. KOBLIK and L. I. MANEVICH: Axisymmetric contact problem taking adhesion and slip into account
- V. V. NOVOZHILOV: Plane far-field turbulent wake in the light of the generalized von Kármán theory
- V. I. PLIS: On the "condition at an edge" in the linear theory of long surface waves
- V. A. NOVIKOV: On nonstationary regimes of an isothermal reactor with longitudinal mixing
- B. A. GORDIENKO: Linear mechanics of spiral pipe lines
- V. M. SUIAZOV: Magnetic suspensions as micropolar liquids
