

CONTENTS OF NEXT ISSUE

Volume 45, Issue 2, 1981

- POBEDRIA B.E. : Quasi-static problem of the mechanics of a deformable solid body in terms of stresses.
- ASHCHEPKOV L.T.: Optimal control of a system with intermediate conditions.
- OSIPOV Iu.S. and PIMENOV V.G.: On positional control in the presence of aftereffect in the controlling forces.
- TOMSKII G.V.: On dynamic games with fixed duration.
- UKHOBOTOV V.I.: On the construction of a stable bridge in the game of restraint.
- ISAKOV A.I.: Some identification problems for linear discrete systems with quadratic constraints.
- OVSEEVICH A.I.: Asymptotic behavior of the Bellman function in a stochastic problem of optimum control.
- KRAIKO A.N.: Variational principles for the flow of an ideal gas with strong discontinuities in Euler variables.
- SEKERZH-ZEN'KOVICH S.Ia.: Construction of the fundamental solution for the operator of internal waves.
- ZAVOLZHENSKII M.V.: Wind perturbations of the surface of a viscous liquid.
- LIUBIMOVA T.P. and LIUBIMOV D.V.: On convective motions of a visco-plastic liquid in a porous medium.
- GUPALO Iu.P., NOVIKOV V.A. and RIAZANTSEV Iu.S.: On a flow system with chemical reaction of fractional order in the presence of axial dispersion.
- CHIKOVA S.P.: On stability of the plane flame front.
- SULIM G.T.: Antiplane problem for a system of linear inclusions in an isotropic medium.
- OSIPOV I.O.: On propagation of elastic vibrations from a point source within an anisotropic half-space.
- ALEKSANDROV V.M. and ZELENTSOV V.B.: Asymptotic methods of the solution of two-dimensional dynamic problems for a visco-elastic layer with mixed boundary conditions.
- KOVALENKO E.V.: Dynamic problem on the interaction of a rigid die with a fluid across a thin cover.
- BORZYKH A.A.: A three-dimensional self-similar problem on supersonic wedging of an elastic body.
- BORSHCHUK E.M., PANASIUK V.V. and SAVRUK M.P.: State of stress in a plane circular ring weakened by a system of curvilinear cuts.
- KANAUN S.K.: On the problem of a three-dimensional crack in an anisotropic elastic medium.
- NIASHIN Iu.I.: On control of procedures of material processing with the aim of reducing residual stresses.
- GUZ' A.N.: On the stability theory of thin-walled cylindrical shells under external pressure.
- SIMONOV I.V.: A formula for the imaginary parts of characteristic values in the problem of vibrations of a shell in a compressible fluid.
- KALINCHUK V.V. and POLIAKOVA I.B.: On disturbance of an initially stressed cylinder.
- AGALAROV D.G., NURIEV B.R. and RAKHMATULIN Kh.A.: Impact of a cone on a deformable string.
- SEMKIN B.V. and IUSHIN A.V.: The Danilovskaia problem in the case of the boundary of an elastic half-space moving with constant velocity.
- KIPNIS I.A.: Homogeneous problem for a wedge with a symmetric crack at the apex.
