

CONTENTS OF NEXT ISSUE

Volume 45, Issue 5, 1981

- AKULENKO L.D.: Application of methods of averaging and successive approximations for the study of nonlinear oscillations.
- RIASHKO L.B.: Stabilization of linear systems with multiplicative noise and incomplete information.
- SUMBATOV A.S.: On cyclic coordinates of conservative systems with three degrees of freedom.
- MARINBAKH M.A.: On Liapunov periodic motions of a heavy rigid body with a fixed point in the general case.
- KARAPETIAN A.V.: A permanent rotation of a heavy rigid body on an absolutely rough horizontal plane.
- KATS I.Ia.: On the convergence of procedures of stochastic approximation for Markov deviations in measurements.
- SHAKHVERDIAN S.V.: On the solution of problems of optimization with constraints.
- SMIRNOV E.M.: Self-similar solutions of the Navier-Stokes equations for twisted flows of an incompressible fluid in a circular pipe.
- BERDICHEVSKII V.L.: On the force acting on a body in a viscous fluid.
- VASIL'EV M.M.: On the force acting on a cylinder in a steady flow in a viscous fluid at low Reynolds number.
- BURYSHKIN M.L.: General scheme of solving nonhomogeneous linear problems for symmetric mechanical systems.
- RVACHEV V.L. and SINEKOP N.S.: Structures of different-type solutions of axisymmetric problems for elastic bodies of finite dimensions.
- LOBODA V.V.: Application of the averaging method to the analysis of a plate reinforced by a stringer.
- VOLKOV S.I.: Example of stochastic bifurcation in the theory of bending of non-ideal plates.
- SRUBSHCHIK L.S.: Secondary edge effect in bending of thin elastic shells.
- PURTOV V.A. and PSHENICHNOV G.I.: Optimal design of a net-like spherical shell with a fixed first proper frequency of axisymmetric oscillations.
- ROGACHEVA N.N.: Equations of state of piezoceramic shells.
- MOKRIK R.I. and PYR'EV Iu.A.: Properties of solutions of the dynamic problems of the generalized coupled thermoelasticity.
- POVSTENKO Iu.Z.: Conditions on the line of contact of three media.
- LEONOV M.Ia. and NISNEVICH E.B.: Structural concepts in the mechanics of elastoplastic deformations.
- BYKOVTSSEV G.I. and TSVETKOV Iu.D.: Application of the perturbation method to the theory of torsion of elastoplastic shafts.
- SMETANIN B.I. and SOBOL' B.V.: Extension of an elastic half-space with a crack placed normal to its surface.
- VERBITSKII V.G. and LOBAS L.G.: Method of determining singular points and their characteristics in problems of plane motion of a vehicle on wheels.
- GUREVICH I.L.: On the existence of solution of the problem of potential flow passed a symmetric profile in a channel.
- SEDOVA G.L.: Strong discontinuities of the electromagnetic field in magnets.
- GOLUBIATNIKOV A.N. and TRUSKINOVSKII L.M.: A class of exact solutions in the problem of asymmetric gravitational compression of a body.
