

CONTENTS OF NEXT ISSUE

Volume 45, Issue 6, 1981

- SEDOV L.I.: Forms of energy and their transformations.
- CHERNYI L.T.: Passing from the mechanics of the special theory of relativity to Newtonian mechanics and relativistic effects.
- UKHOBOTOV V.I.: Construction of the price of a game in some differential games with fixed time.
- VAKHRAMEEV S.A.: Mixed strategies and their application in differential games of approach and evasion.
- KASATKIN G.V.: Extremum properties of stable resonant motions.
- NEISHTADT A.I.: Estimates in the Kolmogorov theorem on conservation of conditionally periodic motions.
- TITOVA T.N.: On finding the normal form of Hamiltonian matrices.
- BETIAEV S.K.: Formation of a jet during nonstationary efflux of an ideal liquid from a crack.
- PLIS V.I.: Propagation of Kelvin waves from a channel into a semi-infinite basin.
- TERENT'EV E.D.: Linear problem of a vibrator in a subsonic boundary layer.
- LYSIKOV Iu.I.: On the flight into a vacuum of a gaseous ellipsoid with repulsion between particles.
- ZHDANOV V.M. and ZAZNOBA V.A.: Non-isothermal flow of a gas mixture in a channel with intermediate Knudsen numbers.
- DVORIANINOV V.G., SVESHNIKOVA E.I. and SIBGATULLIN N.R.: On frictional resistance during the motion of an aerostatic support with an elastic diaphragm.
- BERMAN V.S.: Evolution of finite long-wave disturbances during nonstationary burning of powder.
- NAKHMEIN E.L., NULLER B.M. and RYVKIN M.B.: Deformation of a composite elastic plane weakened by a periodic system of arbitrarily loaded cracks.
- AKULENKO L.D.: Reduction of an elastic system into a given state by means of forces on the boundary.
- MEDVEDEV N.G.: Problem of optimum guidance by its natural frequency of vibrations of an orthotropic bar of revolution and its finite-dimensional approximation.
- ARUTIUNIAN N.Kh. and KOLMANOVSKII V.B.: On stability of nonhomogeneous viscous elastic reinforced bars.
- NIKOLAEVSKII V.N.: On fracture of viscous bodies.
- ZHELNOROVICH V.A.: Electroelastic waves in polarized media.
- SINITSYN V.A.: Theorems of Carnot-Ostrogradski for systems with nonstationary constraints.
- AMIRASLANOV I.A. and CHEREPANOV G.P.: Filtration of a fluid in a curvilinear layer of variable thickness.
