

CONTENTS OF NEXT ISSUE

Volume 47, Issue 4, 1983

- BRATUS' A.S. and SEIRANIAN A.P.: Bimodal solutions in problems of optimization of eigenvalues.
- DIMENTBERG M.F.: Exact solutions of the Fokker-Planck-Kolmogorov for some multidimensional dynamic systems.
- ZHURAVLEV V.F.: Method of Lie series in the problem of separation of motions in non-linear mechanics.
- FORMAL'SKII A.M., On corner points of the boundary regions of attainment.
- MARKEEV A.P.: On dynamics of a rigid body on an absolutely rough plane.
- GORODTSOV V.A.: Evolution of axisymmetric distribution of vorticity in an ideal incompressible stratified liquid (linear description).
- BEDRIKOVETSKII P.G. and LUR'E M.V., Stability and admissibility of discontinuities in systems of equations of two-phase filtration.
- GOLUBKIN V.N.: On the asymptotic theory of three-dimensional hypersonic radiating gas flow past bodies.
- NI A.L.: Nonlinear resonant oscillations of a gas in a pipe under the action of a periodically varying pressure.
- KRAIKO A.N. and SULAIMANOVA S.M.: Two-liquid flow of a mixture of a gas with rigid particles with "films" and "strings" generated by flows past impermeable surfaces.
- MANILOVICH S.V. and TEREENT'EV E.D.: On the influence of heat exchange and injection on the structure of laminar hypersonic flow past a body.
- VIGDERGAUZ S.B.: Inverse problem of the two-dimensional theory of electricity in hydrodynamic formulation.
- LIN'KOV A.L.: Plane problems of static loading of piece-wise homogeneous, linearly elastic medium.
- KANAUN S.K.: Correlation function of the stress field in an elastic medium with point defects.
- SRUBSHCHIK L.S.: Nonaxially symmetric buckling and post critical behavior of elastic spherical shells in the case of double critical value of the loading.
- SVESHNIKOVA E.I.: Quasi-transverse shock waves in an elastic medium for special types of initial deformation.
- GALITSYN A.S.: On thermo mechanical state of subterranean cavities filled with a well mixed liquid.
- MANZHIROV A.V.: Axisymmetrical contact problems for nonuniformly aging viscoelastic layered foundation.
- NOVOZHILOV V.V.: Steady near-wall flows in the light of Von Karman's generalized theory.
- BYKOVTSSEV A.S.: On conditions of the initiation of motion of two colinear dislocational discontinuities.
- ASLANIAN A.G.: On remainder terms in formulas of distribution of frequencies of vibrations of shells.
