

## CONTENTS OF NEXT ISSUE

Volume 47, Issue 6, 1983

- KRIAZHIMSKII A.V., MAKSIMOV V.I. and OSIPOV Iu.S.: On positional modeling of dynamic systems.
- GRIGORENKO N.L.: A method of pursuit by several guided objects of different type.
- PASHKOV A.G. and TEREKHOV S.D.: On a game of optimal pursuit of one object by two.
- VIAZGIN V.A.: On a differential game of approach.
- ZHURAVLEV S.G.: Quasi-periodic motions in the field of attraction of a rotating triaxial ellipsoid.
- MOSHCHUK N.K.: On the motion of the Chaplygin sphere on a horizontal plane.
- KHARLAMOV M.P.: Bifurcation of coincident levels of first integrals in the Kovalevskaia case.
- LUSENIKOV A.A. and PISKUNOV V.N.: Analytical solutions in the theory of coagulating flow systems.
- BASAK N.K. and DOMBROVSKII G.A.: On the solution of filtration problems with a limiting gradient.
- PLIS V.I.: Diffraction of Kelvin waves in a channel with a semi-infinite wall.
- PODDUBNIAK A.P.: High frequency asymptotics of reflected and transmitted waves for dispersion of sound by a hollow elastic sphere with a liquid filling.
- BELINSKII B.P.: Diffraction of a plane wave by an infinite elastic plate, reinforced by a doubly periodic set of stiffeners.
- MAKOVENKO S. Ia.: Some versions of formulating problems of the non-linear theory of elasticity in terms of stress.
- MIKHAILOV S.E.: Solution on problems of antiplane deformation of elastic bodies with corner points by the method of integral equations.
- KHOLMATOV T.: Methods of solution of the spatial problem of the mechanics of a deformable solid body in terms of stress.
- BOGAN Iu.A.: Two boundary value problems for a strongly anisotropic non-homogeneous elastic ring.
- KHLUDNEV A.M.: On the problems of contact of a linear elastic body with elastic and rigid bodies (variational approach).
- KUDISH I.I.: On formulation and investigation of the spatial contact problem for elastic bodies under conditions of mixed friction.
- BERDICHEVSKII V.L. and STAROSEL'SKII L.A.: On the theory of curvilinear Timoshenko-type bars.
- LEONOV M.Ia. and PEREDERII V.D.: Rigidity in elasto-plastic torsion of simple bars.
- SEREGIN G.A.: Extension of the variational formulation of the problem for a rigid plastic medium to the velocity field with slip-type discontinuities.
- POVSTENKO Iu.Z. and PODSTRIGACH Ia.S.: Differentiation with respect to time of tensors given on a surface which is moving in three dimensional Euclidean space.
- BASHKIROV A.G. and KOROL'KOV G.A.: On surface viscosity on the boundary of phase separation.
- CHERNIAEV A.P.: Filtration in curved non-homogeneous layers with a conductivity of a certain class.
