

CONTENTS OF NEXT ISSUE

Volume 48, Issue 3, 1984

- AMINOV A.B. and SIRAZETDINOV T.K.: Conditions of sign determinacy of even modes and global stability of non-linear homogeneous systems.
- IRTEGOV V.D.: On stability of invariant manifolds of mechanical systems.
- BOLOTIN S.V.: Influence of singularities of potential energy on the integrability of mechanical systems.
- MARKEEV A.P.: On stability of rotation of a rigid body around a vertical in the presence of collisions with the horizontal plane.
- ROSENBLAT G.M.: On vibrational stabilization of the Lagrangian top.
- GOLUBKIN V.N.: Hypersonic flow past a triangular wing for large angles of attack.
- TARAPOV I.E.: Variational principle in hydromechanics of an isotropically magnetized medium.
- GOGOSOV V.V., NALETOVA V.A., TAKTAROV N.G., CHYONG ZA BIN' and SHAPOSHNIKOVA G.A.: Hydrodynamics of surface phenomena.
- FILIPPOV A.V. and CHERNYI L.T.: Models of polarizing continuous media with internal mechanical moments.
- KONDAUROV V.I.: On non-linear equations of the dynamics of an elastic micropolar medium.
- KULIKOVSKII A.G. and SLOBODKINA F.A.: On stability of one-dimensional stationary solutions of hyperbolic systems of differential equations in the presence of points where one of the characteristic speeds is vanishing.
- RYKHLEVSKII YA.: On Hooke's law.
- FOKIN A.G.: A method of solutions of problems of linear theory of elasticity.
- MIRONENKO N.I.: On a periodic mixed problem for a strip.
- TIKHONENKO L.YA.: On features of solving the problem for an elastic half-plane with a bar orthogonally protruding the boundary.
- NIKISHOV G.P. and CHEREPANOV G.P.: Extension of an elastic half-space with an isolated rigid bar.
- POROSHIN V.S.: On the question of boundedness of contact pressures on the contour of a die, elliptic of the plane, interacting with an elastic layer.
- KUZ'MENKO V.I.: On contact problems of the theory of plasticity for complex loading.
- SIMONOV I.V.: On steady motion of a crack with regions of slip and separation along the boundary of two elastic materials.
- VARKHALEV I.U.P. and GORR G.V.: Asymptotic pendular motions of the Hess-Appelrot gyroscope.
- KHAZIN L.G.: Interaction of resonances of third order in problems of stability of Hamiltonian systems.
- VERBITSKII V.G. and LOBAS L.G.: Regions of attraction in the problem of plane motion of systems with rolling.
- BRUTIAN M.A. and KRAPIVSKII P.L.: Motion of a system of vortex rings in an incompressible fluid.
- PUTIATIN B.V.: Exact solution of equations of heat propagation in a radiating medium.
- ZHUPIEV A.L. and MIKHLIN I.U.V.: On stability of non-linear stationary waves.
