

JOURNAL OF APPLIED MATHEMATICS & MECHANICS

CONTENTS OF NEXT ISSUE

Volume 55, Issue 2, 1991

- AKULENKO L.D.: Quasistationary finite control of motion of hybrid oscillatory systems.
- BELETSKII V.V. and GOLUBITSKAYA M.D.: Stabilization and extremal properties of resonance regimes of two-legged walking.
- SELIG G.M.: Application of screw theory to the dynamics of robots.
- TARAS'YEV A.M.: Program structures in problems of control with a vector criterion.
- POLUBARINOVA-KOCHINA P.YA.: On supplementary parameters in examples of circular quadrangles.
- PIVEN V.F.: Method of axisymmetric generalized analytic functions in the study of dynamic processes.
- PETROV A.G. and CHUVASHOV A.N.: On finite amplitude waves on the separation boundary of two flows of heavy, ideal, incompressible liquid.
- MARCHENKO A.V. and PROKHOROV I.V.: On linear waves in fluid flow with constant vorticity under an ice cover.
- TRET'YAKOV P.V.: Integral solutions of the wave equation and the diffraction problem of an arbitrary acoustic wave at a wedge.
- GUMEROV N.A.: On weakly linear oscillations of the radius of a vapour bubble in an acoustic field.
- BUZHINSKII V.A. and MEL'NIKOVA I.M.: Determination of resistance of vibrating plates in a liquid.
- TEODOROVICH E.V.: Turbulent diffusion of a passive additive.
- VASIL'YEVA N.L., SEDOVA G.L. and CHERNYI L.T.: Cylindrical probe in an electro-hydrodynamic flow with a non-colinear electric field potential.
- GIL'MAN O.A. and PILIUGIN N.N.: Pareto-optimal shapes of axisymmetric bodies for motion with large supersonic speeds.
- ALEKSEYEVA L.A.: Analogies of the Kirchhoff and somigliana formulas in plane problems of elastodynamics.
- TERESHCHENKO V.YA.: On the problem of the foundation of variational formulations of the boundary element method.
- STEPANOV A.V.: On forced motion of linear elastic systems with damping.
- EREMEYEV V.A.: Stability in the small of states of hydrostatic compression in non-linearly thermo-viscoelastic bodies of the differential type.
- ZHARII O.IU.: Modal theory of electromechanical transformation of energy in piezoelectric bodies.
- KASIMOV A.R.: Optimization of irrigation in a hydrodynamic model of filtration.
- KLIACHKO S.D.: On conditions of zero-solutions in electromagneto elasticity.
- TSVETKOV A.N. and CHEBAKOV M.I.: Effective method of solution of a class of infinite systems in contact problems of the theory of elasticity.
- KUTRINOV V.N. and MAL'TSEV L.E.: Spectral regularization of the integral equations of the theory of elasticity.
