

## **JOURNAL OF APPLIED MATHEMATICS AND MECHANICS** **CONTENTS OF NEXT ISSUE** Volume 56, No. 2, 1992

- F. L. CHERNOUS'KO: Control synthesis in a non-linear dynamical system
- A. N. KRASOVSKII: Control in mixed strategies on the minimax of an integral functional
- A. B. NAISHUL: Three-dimensional motion of a material point
- S. A. AGAFONOV: Stability of motion of non-conservative mechanical systems
- S. A. DOVBYSH: Kolmogorov stability, the impossibility of Fermi acceleration and the existence of periodic solutions in some Hamiltonian-type systems
- S. V. BOLOTIN: Variational methods of constructing chaotic motions in rigid-body dynamics
- Ye. P. KUBYSHKIN: Optimal control of the rotation of a solid with a flexible rod
- O. Yu. DINARIYEV: Signal propagation in a relativistic fluid with viscosity and heat conduction
- V. A. GORODTSOV: Fast asymptotic form of the resistance of bodies in a waveguide layer of non-uniform fluids
- Yu. N. GORDEYEV: A disc-shaped hydraulic fracture crack in a poroelastic medium
- Ye. N. VIL'CHEVSKAYA and S. K. KANAUN: Integral equations for a thin inclusion in a homogeneous elastic medium
- I. A. LUBYAGIN, D. A. POZHARSKII and M. I. CHEBAKOV: Embedding of a punch in the form of an elliptic paraboloid into an elastic spatial wedge
- L. M. ZUBOV and A. N. RUDEV: An effective method of verifying Hadamard's condition for a non-linearly elastic compressible medium
- I. V. DOROKHOV, O. D. PRYAKHINA and M. R. FREIGEIT: The action of an unsteady load on a system consisting of a massive punch and layered foundation
- T. I. BELYANKOVA and V. V. KALINCHUK: On shear vibrations of a punch on the surface of a pre-stressed half-space
- S. V. YERMAKOV: Investigation of the formulation of the boundary-value problem of the local theory of elastoplastic processes
- A. R. ISAYUK-SAYEVSKAYA and A. S. KEL'ZON: Dynamics of a high-revolution compressor
- N. N. KOCHINA: The motion of a viscous fluid in a pipe of finite length
- N. G. KUZNETSOV: The lower bound of the eigenfrequencies of plane oscillations of a fluid in a channel
- M. A. BRUTYAN and P. L. KRAPIVSKII: Internal properties of some rheological models of a viscoelastic fluid
