

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 59, No. 5, 1995

- G. G. GARNYSHEVA and I. I. SUBBOTIN: Sub-optimal universal strategies in fast response game problems
- I. S. RAPPOPORT and A. A. CHIKRII: On the guaranteed result in a differential game with a terminal payoff function
- D. S. ZAVALISHCHIN and S. T. ZAVALASHCHIN: Energy-optimal control of a cylinder in a viscous medium by its motion
- L. D. AKULENKO: Control of membrane motions by means of boundary force actions
- L. V. PETUKHOV: Necessary Weierstrass conditions for elliptic systems
- M. N. ZARIPOV, N. R. SIBGATULLIN and A. CHAMORRO: On the possibility of equilibrium positions of rapidly rotating bodies in gravitational fields
- A. I. RYLOV: The monotonicity properties for the solutions of first-order elliptic systems and their applications to the equations of fluid and gas dynamics
- O. V. VOINOV: On spreading of a viscous liquid drop on a surface due to capillary forces
- O. Yu. DINARIYEV: On the hydrodynamic description of the multicomponent multiphase mixture in the narrow pores and in thin layers
- S. A. GRISHCHIN: Problems with Toeplitz or quasi-Toeplitz matrices arising from statical stability analysis of elastic systems
- A. G. KULIKOVSKII: The effect of small anisotropy of the features of shock waves in compressible elastic media
- A. V. STEPANOV: The damping of free oscillations in movable elastic systems
- Yu. D. KAPLUNOV and E. V. NOL'DE: The quasifront in the problem of the action of an instantaneous point impulse at the edge of a conical shell
- D. A. POZHARSKII: The spatial contact problem for an elastic wedge with an unknown contact area
- N. V. GENERALOVA and E. V. KOVALENKO: On the action of a strip-like punch on a linearly deformable foundation reinforced by a thin covering
- L. A. FIL'SHTINSKII: Extension of a layer weakened by tunnel cuts
- A. V. MANZHIROV: The general non-inertial initial boundary-value problem for a viscoelastic ageing solid under piecewise continuous accretion
- V. A. GRISHIN and V. V. REUT: The stressed state of a box-like shell stiffened by a pair of symmetric inclusions parallel to the shell rib
- A. N. ALI-ZADE and Ya. A. EYUBOV: A variational principle of analysing long-term durable structures
- A. G. KOLPAKOV: Addition to the paper "On the thermo-elasticity problem of non-uniform plates"
