

**JOURNAL OF APPLIED MATHEMATICS AND MECHANICS**  
**CONTENTS OF NEXT ISSUE**  
Volume 59, No. 6, 1995

- L. A. BONDARENKO, Ye. S. KIRPICHNIKOVA and S. N. KIRPICHNIKOV: Stability of linear periodical Hamiltonian systems under non-Hamiltonian perturbations
- V. M. MATROSOV and I. A. FINOGENKO: Right-side solutions of differential equations for the dynamics of mechanical systems with sliding friction
- A. S. SUMBATOV: Conditions for onset of sliding in a plane system with friction
- M. I. FEIGIN: Complicating structures of the bifurcation tree for piecewise smooth systems
- N. N. BOLOTNIK: The motion of a rigid body on a two-stage joint in a uniform gravitational field
- V. V. RUMYANTSEV: Comparison of three methods of construction of Lyapunov's functions
- B. S. BARDIN and A. P. MARKEYEV: On the stability of equilibrium of a pendulum with vertical oscillations of its support point
- A. P. IVANOV: The problem of a multiple collision
- Ye. V. ABRAROVA: On the stability of steady motions of a rigid body in a central field
- N. Yu. LUKOYANOV: On a conflict control problem under mixed constraints
- A. M. TARASYEV: Solution of evolutionary games using the theory of Hamilton–Jacobi equations
- M. TUKHTASINOV: Some problems of differential games of pursuit for systems with distributed parameters
- A. G. PASHKOVA and A. V. SINITSYN: Constructing the cost function of a pursuit–evasion differential game with three pursuers and one evader
- S. I. MORINA and A. G. CHENTSOV: Bounded realization of asymptotically attainable elements
- V. A. BATISCHEV: Self-similar solutions for unsteady thermocapillary fluid flow
- S. A. YEGORUSHKIN and F. A. SLOBODKINA: Unsteady process in Ram/Scramjets induced by stage separation
- A. L. GOL'DENVEIZER: On the boundary calculations of thin elastic bodies
