

# JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

## CONTENTS OF NEXT ISSUE

### Volume 60, No. 4, 1996

- I. M. BORKOVSKAYA and V. M. MARCHENKO: A new approach to the problem of stabilization of time-delay systems
- R. GABASOV, F. M. KIRILLOVA, Ye. A. KOSTINA and O. I. KOSTYUKHOVA: Stabilization of dynamical systems by the positional solutions of special optimal control problems
- Yu. G. BULYCHEV and A. A. MANIN: Synthesis of suboptimal control for stochastic systems using a prediction model
- S. V. SOKOLOV: On the solution of the stochastic optimal control synthesis problem based on non-linear probabilistic criteria
- G. V. PAPAKOV, A. M. TARAS'YEV and A. A. USPENSKII: Numerical approximation for generalized solutions of Hamilton–Jacobi equations
- L. B. RYASHKO: On the stability of stochastically perturbed motions
- S. P. SOSNITSKII: On the instability of Lagrangian configurations of attracting mass points
- N. A. OSTAPENKO: On the asymptotic solution of the entry problem of a thin three-dimensional body into a compressible fluid
- V. U. NABIYEV and S. V. UTYUZHNIKOV: The spatial supersonic motion of a body through a large-scale inhomogeneity in the stratified atmosphere
- V. Ya. TERESHCHENKO: On the interrelation of formulations of the method of boundary elements
- S. A. YEGORUSHKIN and G. V. SHUBIN: On the stability of a plane longitudinal shock wave in an isotropic elastic medium
- G. I. MIKHASEV: Localized sets of bending waves in a non-circular shell with slanted edges
- Yu. D. KAPLUNOV and Ye. V. NOL'DE: On the effect of transverse compression in shell dynamics
- V. P. MATVEYENKO, I. Ye. TROYANOVSKII and G. S. TSAPLINA: Solution of elastic problem developed as a series in elasticity constants and their applications to viscoelasticity
- A. N. DRUZ', Yu. A. USTINOV and N. A. POLYAKOVA: Homogeneous solutions and the Saint Venant problem for a naturally twisted bar
- Yu. A. ANTIPOV: A debounded inclusion in the case of adhesion and slippage
- V. M. ALEKSANDROV and A. A. SHMATKOVA: Non-linear unsteady creep of an ice plate on a hydraulic foundation
- M. V. DOLOTOV and I. D. KILL': Coupled dynamic problem of thermoelasticity for a half-space
- A. A. YEVTUSHENKO and V. I. PAUK: Unsteady contact problem for rough bodies with heat generation caused by friction
- S. Ye. ALEKSANDROV and R. V. GOL'DSHTEIN: Rigid-plastic analysis of limiting equilibrium of an edge tensile crack in a rectangular plate
- A. S. STROGANOV: An extension of the Hencky theorem
