

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

CONTENTS OF NEXT ISSUE

Volume 62, No. 3, 1998

- V. N. TKHAI: On the Lyapunov–Poincaré method in the theory of periodic motions
- A. P. MARKEYEV: On the critical case of two zero roots in a Hamiltonian system with two degrees of freedom
- A. P. IVANOV: Discontinuous motions in systems with unilateral constraints
- V. G. WIL'KE and M. V. DVORNIKOV: Rolling of a fire wheel on a plane
- I. F. BORETSKII and O. R. KAYUMOV: Globally controllable systems of rigid bodies
- V. I. MATYUHIN: The slow variables for the flexible manipulator control problems
- V. P. MASLOV and A. I. SHAFAREVICH: Localized asymptotic solutions for Navier–Stoke equations and laminar traces in incompressible fluid
- O. Yu. DINARIYEV: Temperature effects in the functional density approach for the description of a multicomponent mixture
- E. V. TEODOROVICH: On the asymptotic forms of solutions to the diffusion equation with non-linear sink. Renormalization group approach
- Ye. V. GLUSHKOV and Ye. V. KIRILLOVA: Dynamic mixed problem for a multilayered elastic packet
- A. O. VATUL'YAN and V. M. SHAMSHINE: A new version of the boundary integral equations and their application to the dynamic three-dimensional problems of the theory of elasticity
- S. A. KORENSKII: On the formulation of linearized boundary integral equations of anisotropic theory of elasticity and their applications to geometric inverse problems
- V. M. FOMIN: Antiplane waves in an elastic medium with doubly periodic system of holes
- S. A. NAZAROV: A crack at the interface of anisotropic bodies. The stress singularities and invariant integrals
- K. S. SULTANOV: Non-linear law of deformation of soft soils
- R. S. SULIKASHVILI: On the motion of a symmetric girostat in a Newtonian force field
- P. Ya. KOCHINA and N. N. KOCHINA: On the problem of earth dams
- I. I. DEMCHIK: On the theory of filtration with decreasing output
- V. G. ZHARINOV: Time-dependent dissipative flows in unbounded space and near plane surfaces
- A. V. KAPTISOV and S. V. KUZNETSOV: Spatially periodic fundamental solutions of the free vibration theory
