

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS CONTENTS OF NEXT ISSUE Volume 63, No. 4, 1999

On the 275th anniversary of the Russian Academy of Sciences

B. S. BARDIN: Bifurcation of periodic solutions of a nearly Lyapunov system

M. A. AZEEZ, A. F. VAKAK and L. I. MANEVICH: Exact solutions of a vibro-impact problem for the two-degree-of-freedom system

E. E. SHNOL': On the loss of stability of symmetric equilibria positions

V. B. KOLMANOVSKII: Stability of some Volterra equations with discrete time

A. A. MAILYBAEV and A. P. SEYRANIAN: On stability domains of Hamiltonian systems

Kh. G. GUSEINOV, A. A. NEZNAKHIN, V. N. USHAKOV: Approximate construction of reachable sets of control systems with integral restrictions on control

O. Yu. DINARIYEV: The basic assumptions of the phenomenological approach in non-local hydrodynamics

E. N. BERESLAVSKII: On the Zhukovskii problem of the flow past a slot

Yu. V. KISTOVICH and Yu. D. CHASHECHKIN: Exact solution of the linearized problem of monochromatic internal wave generation in a viscous fluid

Y. I. KAPRANOV: On the solid particle suspension flow in a porous medium

A. G. YEGOROV: A contact problem in plane consolidation theory

L. D. AKULENKO and S. V. NESTEROV: Natural oscillations of distributed non-homogeneous systems described by generalized boundary-value problems

A. P. CHUGAINOVA: On the existence of Riemann invariants for one-dimensional equations of the non-linear theory of elasticity

A. G. KOLPAKOV and I. G. SHEREMET: Stiffnesses of inhomogeneous plates

I. I. ARGATOV: The indentation of a punch with an elliptic paraboloid form into a flat boundary of an elastic body

A. G. SHATALOV: Ray method for solving a three-dimensional dynamic problem of coupled thermo-elasticity for a sphere

V. Y. STOLBOV and P. V. TRUSOV: Coupled optimization problems of the processes of elastoplastic deformation of metals

Z. P. KOZLOVA: Remarks on impact action

S. Ye. NOSOV: Diffraction of a plane elastic wave by a wedge in the case of special boundary conditions

Announcement to authors and readers of the *Journal of Applied Mathematics and Mechanics*
