

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS
CONTENTS OF NEXT ISSUE
Volume 67, No. 2, 2003

- I. M. ANAN'YEVSKII: Continuous feedback control for perturbed mechanical systems
L. D. AKULENKO and A. M. SHMATKOV: The evasion of a dynamical object from a fixed sphere under the action of a bounded force
S. A. BRYKALOV: Two problems of evasion on a plane with separated controls and non-convex terminal sets
G. V. NAUMOV: Optimal synthesis in a two-dimensional problem with non-symmetric control restriction
A. P. IVANOV: Singularities in mechanical systems with non-ideal constraints
A. A. BUROV: On the existence and stability of equilibria of mechanical systems subject to constraints realized by large potential forces
A. Kh. GELIG: Stability of linearized non-linear impulsive systems
S. A. AGAFONOV: On the stability of non-conservative systems and estimate of the attraction domain
V. M. BUDANOV and Ye. A. DEVYANIN: On the motion of wheeled robots
A. V. BORISOV and I. S. MAMAYEV: The Hess case in rigid body dynamics
N. G. BANDURIN: Large dynamic displacements and deformation of a massive extensible string in a moving medium
Yu. A. DEM'YANOV, D. V. KOKAREVA and A. A. MALASHIN: The interaction of transverse and longitudinal vibrations in musical strings
P. CAPODANNO: On the stability and small oscillations of the liquid bridge between two coaxial disks in low gravity conditions
D. V. DOLGIKH and V. V. KISELEV: Two-dimensional model of a strong deformation in a non-linear elastic plate
A. A. BURENIN, L. V. KOVTANYUK and M. V. POLONIC: The formation of a one-dimensional residual strain field in the vicinity of a cylindrical continuum defect in an elastic-plastic medium
R. I. NEPERSHIN: Cylinder rolling and sliding on the boundary of a rigid-plastic half-space
