

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS
CONTENTS OF NEXT ISSUE
Volume 69, No. 2, 2005

- Yu. N. ZHELNIN, A. A. MELIKYAN, A. Ye. UTIMOV and F. L. CHERNOUS'KO: Time-optimal bringing of a non-linear manoeuvring object to the optimal position
- S. V. VOLKOV: Simulation of controlled motion of a point on a plane
- A. A. ZOBOVA and A. V. KARAPETYAN: Construction of the bifurcation diagrams of Poincaré–Chetaev and Smale in the case of conservative non-holonomic systems with symmetry
- A. A. BUROV: The first integrals in the problem on motion of a heavy rigid body about a fixed point subject to a unilateral constraint
- A. P. YEVDOKIMENKO: Steady motions of a tethered gyrostat in the central gravitational field
- N. A. KUDRYASHOV: First integrals for equations of non-linear wave dynamics
- O. Yu. DINARIYEV: The role of the cross-terms in transport law in the case of a steady gas–condensate flow near a well
- A. I. RYLOV: Unsteady analogue of Chaplygin equations in one-dimensional gas dynamics
- G. Ye. YAKUNINA: Three-dimensional motion of optimum pyramidal bodies
- L. P. VOVK and B. V. SOBOL': Concentration of a wave filed at the interface of elastic media
- L. P. VOVK and B. V. SOBOL': Features of dynamic stress at the joint of three elastic media
- Yu. TSVELODUB: A three-dimensional inverse problem for physically non-linear inhomogeneous media
- R. D. BANTSURI and N. N. SHAVLAKADZE: The bending problem for a beam lying on an elastic foundation
- I. I. ARGATOV: Approximate solution of the axisymmetric contact problem for an elastic sphere
- V. M. ALEKSANDROV and A. G. KHANYAN: Antiplane periodic contact problems for an inhomogeneous layer
- M. I. CHEBAKOV: Asymptotic solutions of contact problems for a thick elastic layer under friction forces in the contact area
- Yu. Yu. MAKHOVSKAYA: Effect of adhesion on the sliding of viscoelastic bodies
- O. D. PRYAKHINA and A. V. SMIRNOVA: Integral equations of dynamic problems for multilayered media containing systems of cracks
