

JOURNAL OF APPLIED MATHEMATICS AND MECHANICS

Volume 71, No. 2, 2007

G. K. MIKHAILOV and S. Ya. STEPANOV: Leonhard Euler and his contribution to the development of rational mechanics

A. D. BRUNO: Analysis of the Euler–Poisson equations by methods of power geometry and normal form

L. D. AKULENKO and A. P. KOSHELEV: Time-optimal steering of a point mass to a prescribed position with a desired velocity

V. I. MATYUKHIN: Control of a wheeled mechanical system

L. B. RAPOPORT: Estimate of the attraction domain with specified index of exponential asymptotic stability in the problem of control of a wheeled robot

A. A. AZAMOV, A. Sh. KUCHKAROV and B. T. SMATOV: On the relation between the problems of pursuit, controllability and stability in general in linear systems with diverse constraints

A. R. AKHMETZHANOV and A. A. MELIKYAN: A linear differential game on the plane with a minimum-type cost function

S. M. ZEN' KOVSKAYA, V. A. NOVOSYADLYI and A. L. SHLEIKEL': Influence of vertical oscillations on the onset of thermocapillary convection in a horizontal liquid layer

A. N. BOGDANOV and V. N. DIESPEROV: The Tollmien–Schlichting waves in a transonic boundary layer: Excitation from the external flow and from the surface

V. S. GALKIN: Transformations of the equations of the first approximation of Chapman–Enskog methods and vector transport relations for polyatomic gas mixtures

A. A. KOROBKIN and T. I. KHABAKHPASHEVA: Construction of exact solution of the floating plate problem

A. S. KRAVCHUK and P. NEITTAAMÄKI: Solution of contact problems by the boundary element method

V. M. ALEKSANDROV and N. A. BAZARENKO: Contact problem for a rectangle with stress-free lateral faces
