

Thermal Degradation of Polyethylene in a Nitrogen Atmosphere of Low Oxygen Content. II. Structural Changes Occurring in Low-Density Polyethylene at an Oxygen Content Less Than 0.0005%

ARNE HOLMSTRÖM and ERLING SÖRVIK, *The Polymer Group, Department of Organic Chemistry, Chalmers University of Technology and University of Gothenburg, Fack, S-402 20 Göteborg, Sweden*

(article in *J. Appl. Polym. Sci.*, **18**, 761, 1974)

Reaction (10c) on page 773 is incorrect. The formula should read:

Mechanism of the Benzophenone-Sensitized Photodegradation of Polypropylene

D. J. HARPER, *Imperial Chemical Industries Ltd., Organics Division, Blackley, Manchester M93DA, England*, and J. F. MCKELLAR, *Department of Chemistry and Applied Chemistry, University of Salford, Salford M54WT, England*

(article in *J. Appl. Polym. Sci.*, **17**, 3503, 1973)

In Figure 1 (page 3504) the numbers 50, 100, and 150 on the horizontal axis should read 5.0, 10.0 and 15.0.
