

ERRATA**Extrudate Swell During the Melt Spinning of Fibers—
Influence of Rheological Properties and Take-up
Forces**

JAMES L. WHITE and JOSEPH F. ROMAN, *Department of Chemical and
Metallurgical Engineering, The University of Tennessee, Knoxville,
Tennessee 37916*

(article in *J. Appl. Poly. Sci.*, **20**, 1005, 1976)

Equation (28) should read

$$\frac{\pi d^2}{4} B^6 + \frac{F}{G} B^4 = \int_0^{d/2} 2nr(1 + \lambda_{\text{eff}}\Gamma^2) dr$$

Equation (32b) should read

$$B^6 = B^6(0) - \frac{4}{\pi} \frac{\lambda_{\text{eff}} F}{\mu D^2} B^2$$

This latter equation also appears in the *Synopsis* where it is misprinted and should be replaced by the above expression. The calculations and plots in the paper which are based on Eq. (32) are correct.
