Viscoelastic Properties of a Gum Vulcanizate at Large Static Deformations

J. L. SULLIVAN, *Engineering and Research Staff, Ford Motor Company, Dearborn, Michigan 48121*

[article in *J. Appl. Polym. Sci.*, **28**, 1993–2003 (1983)]

By oversight, shift factors added to the response function data in a number of the figures were omitted. The factors, in addition to reference curves, were used to facilitate a comparison of the data. Those omitted factors (in logarithmic units) from the bottom curve to the top curve of each effected figure are as follows: Figure 2: 0.855, 0.546, 0.374, 0.214, 0.134, 0.027; Figure 3: 0.977, 0.553, 0.350, 0.151, 0.084, 0.053; Figure 4: -0.030, -0.013, -0.023, -0.060, -0.077, -0.129; Figure 5: -0.050, -0.048; -0.070, -0.128, -0.125, -0.105; Figure 6: -0.027, -0.025, -0.103, -0.162, -0.236; Figure 9: -0.010, -0.028, -0.260.
