

ANNOUNCEMENT

Fifth International Symposium on Polymer Analysis and Characterization (ISPAC)

June 1-4, 1992, The Inuyama Hotel, Inuyama City, Japan

This three-day Symposium will consist of poster sessions, invited lectures, round-table discussions, and information exchange on recent advances in polymer characterization approaches, techniques, and applications.

Topics will include: chromatography, infrared, NMR, mass spectrometry, chemical characterization, light scattering, rheology, microscopy, viscometry, surface analysis, thermal analysis, thermodynamics, and solution properties of polymers, as well as general contributions on polymer analysis and characterization.

For further information, please contact:

Dr. Sadao Mori
Dept. of Industrial Chemistry

Faculty of Engineering
Mie University
Tsu, Mie, 514
Japan

Tel.: 592-32-1211 Ext. 3843
Fax: 592-31-2252

Dr. Howard Barth
Du Pont Company
Experimental Station
P.O. Box 80228
Wilmington, DE 19880-0228
USA

Tel.: 302-695-4354
Fax: 302-695-1351
