

Announcement

The Eighth International Symposium on Polymer Analysis and Characterization (ISPAC-8)

May 22–24, 1995

Sanibel Island, Florida, USA

The Eighth International Symposium on Polymer Analysis and Characterization (ISPAC-8) will be held May 22–24, 1995 in Sanibel Island, Florida, USA. The three-day symposium will consist of poster sessions, invited lectures, and round-table discussions and information exchange on recent advances in polymer characterization approaches, techniques, and applications. Technical sessions will consist of polymer separations, spectroscopy, scattering techniques, microscopy, and copolymer characterization. In addition, a short course on polymer

analysis and characterization methodologies will be held Sunday, May 21, preceding the symposium.
