

The background of the cover is a high-magnification scanning electron micrograph (SEM) showing a complex, layered, and fibrous structure. The structure consists of numerous overlapping, wavy layers that create a textured, almost crystalline appearance. A prominent dark diagonal line runs from the bottom left towards the top right, possibly representing a crack or a boundary between different material phases. The overall color palette is dominated by shades of yellow, tan, and brown, with the dark line providing a sharp contrast.
