

The background of the cover is a high-magnification scanning electron micrograph (SEM) of a porous polymer network. The structure consists of interconnected, irregular, and somewhat spherical cells or pores, creating a complex, sponge-like lattice. The walls of these pores are thin and appear as bright, interconnected lines against a darker background. The overall appearance is highly porous and interconnected.

Volume 133 | Issues 31–32 | 2016
Included In This Print Edition:
Issue 31 (August 15, 2016)
Issue 32 (August 20, 2016)
