

IN MEMORIAM

Géza Freud 1922–1979

FOREWORD

This is the second volume dedicated to the memory of Géza Freud. A third one, Volume 50, will be published in 1987.

The reader is referred to the first volume, namely, Volume 46, 1–128 (1986), for surveys of different aspects of Freud's research and for related material concerning his life and work.

The influence of this prominent mathematician seems to continue unabated in spite of his untimely death in 1979.
