

ADDENDUM

Volume **87**, Number 2 (1996), in the article “Strictly Positive Definite Functions,” by Kuei-Fang Chang, pp. 148–158: On p. 150, immediately following Theorem 2.1, the following sentence was inadvertently omitted. “The following material, down to the end of the proof of Corollary 2.3, is quoted, with slight alterations, from the 1992 edition of lecture notes prepared by E. W. Cheney for the course ‘Approximation Theory’ at the University of Texas.” The author regrets that an attribution of this textual material to Professor Cheney, present in the preprint of the article, did not appear in its final form.
