

## Calendar of Meetings

It is proposed that the journal will publish information of forthcoming meetings of interest to our readers. We shall list, as accurately as possible, the date, the title of the meeting, the location and any other useful information about the particular meeting. The Editor will be happy to receive information on meetings planned for the future.

Send information to:

Dr. John Avery,  
Department of Chemistry,  
Imperial College of Science and Technology,  
Kensington,  
London, S.W.7.

April 14–16 1971

Faraday Society Discussion: **Electrical Conduction in Organic Solids.** (*To be held in The Chemistry Department, University of Nottingham, University Park, Nottingham.*)

The meeting will be divided into four sections:

*Sections 1 and 2 Photo and Semiconduction in Molecular Crystals*

*Section 3 Conduction in Polymers and Organic Glasses*

*Section 4 Biological Aspects*

Section 4 is of most interest to our readers and the programme is as follows:

D. D. Eley and R. Pethig (Chemistry Dept., Nottingham University)  
*Microwave dielectric and Hall effect measurements on biological materials.*

J. McKellar, J. Weightman and R. J. P. Williams (Inorganic Chemistry Laboratory, Oxford)  
*Organic semiconductors containing metals.*

H. Inokuchi (Institute of Solid State Physics, University of Tokyo, Japan)  
*Catalytic activity of organic semiconductors and enzyme.*

B. Rosenberg (Biophysics Dept., Michigan State University, Lansing, U.S.A.)  
*Semiconductive and photoconductive properties of bimolecular lipid membranes.*

W. H. Simpson (Franklin Institute, Philadelphia, Pa., U.S.A.) and P. J. Reucroft (Dept. of Metallurgical Engineering and Materials Science, University of Kentucky, Lexington, U.S.A.)  
*Electrical characteristics of chlorophyll-a films.*

*Summarizing remarks.* D. D. Eley (Chemistry Dept., University of Nottingham)
