

## Keyword index

- Acyl carrier protein; Translational diffusion; Spin echo; Amide exchange; Bound water 136
- Amide exchange; Bound water; Acyl carrier protein; Translational diffusion; Spin echo 136
- Amide exchange; Hydrogen bonds;  $^1\text{H}$  NMR; Chemical shift temperature coefficients 359
- AMP; Heteronuclear NMR; Specific labeling; RNA structure; In vitro selection 259
- Amphipathic helix; Micelle; Magainin; Membrane 127
- $\phi$  Angle; HIV-1 Nef; Ubiquitin; Carbon-carbon J coupling; HOHAHA; TOCSY; Relaxation 207
- $\chi_1$  Angle; Calmodulin; Carbon-nitrogen J coupling; Quantitative J correlation; Stereospecific assignment; Ubiquitin 323
- Antibiotics resistance; Dihydrofolate reductase; NMR assignments; Drug design 445
- Aromatic rings; Tyrosine residues; Solvent exchange; Isotope filtering; TOCSY experiment 313
- Assignments; Structure; MMP; 3D NMR; Matrix metalloproteinase; Collagenase 11
- Automated polypeptide resonance assignment; Three-dimensional NMR 151
- Azurin; Electron transfer; Paramagnetic relaxation; Spectroscopic probe; Copper proteins; Type 1 copper site 299
- Backbone assignment; Glutamine-binding protein; Triple-resonance NMR 167
- BioMagResBank; PDB database; Chemical shift assignment; Protein; Inverse search 101
- Bound water; Acyl carrier protein; Translational diffusion; Spin echo; Amide exchange 136
- Bovine pancreatic ribonuclease A; Influenza virus A NS-1 protein; BPTI-trypsin complex; Heteronuclear relaxation; Heteronuclear multiple-quantum coherence; Bovine pancreatic trypsin inhibitor 105
- Bovine pancreatic trypsin inhibitor; Bovine pancreatic ribonuclease A; Influenza virus A NS-1 protein; BPTI-trypsin complex; Heteronuclear relaxation; Heteronuclear multiple-quantum coherence 105
- BPTI-trypsin complex; Heteronuclear relaxation; Heteronuclear multiple-quantum coherence; Bovine pancreatic trypsin inhibitor; Bovine pancreatic ribonuclease A; Influenza virus A NS-1 protein 105
- $^{13}\text{C}$ ; Protein; Dynamics; Relaxation; Methyl 437
- $^{13}\text{C}$  relaxation times; Spectral density function mapping; Conformational exchange; Order parameter; Ribonuclease T1; Protein dynamics 63
- Calmodulin; Carbon-nitrogen J coupling; Quantitative J correlation; Stereospecific assignment; Ubiquitin;  $\chi_1$  Angle 323
- Carbon chemical shifts; Cytochrome c; Secondary structure; Heme ring current effect 389
- Carbon-carbon J coupling; HOHAHA; TOCSY; Relaxation;  $\phi$  Angle; HIV-1 Nef; Ubiquitin 207
- Carbon-nitrogen J coupling; Quantitative J correlation; Stereospecific assignment; Ubiquitin;  $\chi_1$  Angle; Calmodulin 323
- Chemical shift; Heteronuclear NMR; Staphylokinase; Plasminogen; Resonance assignment; Secondary structure; NOE 273
- Chemical shift assignment; Protein; Inverse search; BioMagResBank; PDB database 101
- Chemical shift assignments; Helices; Cytokine; Leukaemia inhibitory factor; Isotope labelling; Heteronuclear NMR 113
- Chemical shift temperature coefficients; Amide exchange; Hydrogen bonds;  $^1\text{H}$  NMR 359
- Collagenase; Assignments; Structure; MMP; 3D NMR; Matrix metalloproteinase 11
- Conformational exchange; Order parameter; Ribonuclease T1; Protein dynamics;  $^{13}\text{C}$  relaxation times; Spectral density function mapping 63
- Connectin; Modular proteins; Muscle; Fibronectin 2
- Copper proteins; Type 1 copper site; Azurin; Electron transfer; Paramagnetic relaxation; Spectroscopic probe 299
- Cytochrome c; Secondary structure; Heme ring current effect; Carbon chemical shifts 389
- Cytochrome P450; Metalloprotein; Gallium; Electron transfer; Putidaredoxin 337
- Cytokine; Leukaemia inhibitory factor; Isotope labelling; Heteronuclear NMR; Chemical shift assignments; Helices 113
- 3D heteronuclear NMR; *N*-Acetyllactosamine; Oligosaccharide 47
- 3D NMR; Matrix metalloproteinase; Collagenase; Assignments; Structure; MMP 11
- 3D TOCSY-trNOESY; 1D TOCSY-trNOESY; 1D trNOESY-TOCSY; trNOE; trROE; E-selectin; sialyl Lewis<sup>x</sup> 423
- 1D TOCSY-trNOESY; 1D trNOESY-TOCSY; trNOE; trROE; E-selectin; sialyl Lewis<sup>x</sup>; 3D TOCSY-trNOESY 423
- 1D trNOESY-TOCSY; trNOE; trROE; E-selectin; sialyl Lewis<sup>x</sup>; 3D TOCSY-trNOESY; 1D TOCSY-trNOESY 423
- Degenerate chemical shifts; *Desulfovibrio vulgaris* flavodoxin; Triple-resonance NOESY; Resonance assignments 371
- Desulfovibrio vulgaris* flavodoxin; Triple-resonance NOESY; Resonance assignments; Degenerate chemical shifts 371
- Dihedral angle; Primary amide; Stereospecific assignment; HMQC spectroscopy 306
- $\chi_1$  Dihedral angle; Triple-resonance NMR; Quantitative J spectroscopy;  $^3\text{J}_{\text{CC}'}'$  and  $^3\text{J}_{\text{NC}'}'$  scalar couplings 409
- Dihydrofolate reductase; NMR assignments; Drug design; Antibiotics resistance 445

- Distance geometry; Methylene-acetal linkage; Genetic algorithm 25
- DNA-binding proteins; Protein NMR; Hydrogen–deuterium exchange; Secondary structure thermal stability; Thyroid transcription factor 1 homeodomain; Homeodomain 397
- Drug design; Antibiotics resistance; Dihydrofolate reductase; NMR assignments 445
- Drug design; Intermolecular NOE; Protein solvation; Organic solvent; Hen egg-white lysozyme 441
- Dynamic NMR refinement; MD with time-averaged restraints; T $\Psi$ C-loop; RUMT; RNA/protein recognition 229
- Dynamics; Relaxation; Methyl;  $^{13}\text{C}$ ; Protein 437
- E-selectin; sialyl Lewis $^x$ ; 3D TOCSY-trNOESY; 1D TOCSY-trNOESY; 1D trNOESY-TOCSY; trNOE; trROE 423
- Electron transfer; Paramagnetic relaxation; Spectroscopic probe; Copper proteins; Type 1 copper site; Azurin 299
- Electron transfer; Putidaredoxin; Cytochrome P450; Metalloprotein; Gallium 337
- Fibronectin; Connectin; Modular proteins; Muscle 2
- Floating chirality; Stereospecific assignment; Simulated annealing; ssDNA binding protein; Structure calculation 245
- Gallium; Electron transfer; Putidaredoxin; Cytochrome P450; Metalloprotein 337
- Genetic algorithm; Distance geometry; Methylene-acetal linkage 25
- Glutamine;  $^{15}\text{N}$ ; Superoxide dismutase; Selective labeling 201
- Glutamine-binding protein; Triple-resonance NMR; Backbone assignment 167
- $^1\text{H}$  NMR; Chemical shift temperature coefficients; Amide exchange; Hydrogen bonds 359
- H-ccl0kDa; Secondary structure; Uteroglobin 35
- Helices; Cytokine; Leukaemia inhibitory factor; Isotope labelling; Heteronuclear NMR; Chemical shift assignments 113
- Heme ring current effect; Carbon chemical shifts; Cytochrome c; Secondary structure 389
- Hen egg-white lysozyme; Drug design; Intermolecular NOE; Protein solvation; Organic solvent 441
- Heteronuclear, multidimensional NMR; NOE; Unfolded or partially folded proteins 181
- Heteronuclear multiple-quantum coherence; Bovine pancreatic trypsin inhibitor; Bovine pancreatic ribonuclease A; Influenza virus A NS-1 protein; BPTI–trypsin complex; Heteronuclear relaxation 105
- Heteronuclear NMR; Chemical shift assignments; Helices; Cytokine; Leukaemia inhibitory factor; Isotope labelling 113
- Heteronuclear NMR; Specific labeling; RNA structure; In vitro selection; AMP 259
- Heteronuclear NMR; Staphylokinase; Plasminogen; Resonance assignment; Secondary structure; NOE; Chemical shift 273
- Heteronuclear relaxation; Heteronuclear multiple-quantum coherence; Bovine pancreatic trypsin inhibitor; Bovine pancreatic ribonuclease A; Influenza virus A NS-1 protein; BPTI–trypsin complex 105
- Heteronuclear relaxation; Structural analysis; Protein deuteration; Spin diffusion 79
- HIV-1 Nef; Ubiquitin; Carbon–carbon J coupling; HOHAHA; TOCSY; Relaxation;  $\phi$  Angle 207
- HMQC spectroscopy; Dihedral angle; Primary amide; Stereospecific assignment 306
- HOHAHA; TOCSY; Relaxation;  $\phi$  Angle; HIV-1 Nef; Ubiquitin; Carbon–carbon J coupling 207
- Homeodomain; DNA-binding proteins; Protein NMR; Hydrogen–deuterium exchange; Secondary structure thermal stability; Thyroid transcription factor 1 homeodomain 397
- Human intestinal fatty acid binding protein; Isotope enrichment; Multidimensional NMR spectroscopy; Sequential assignments; Solution structure 213
- Hydrogen bonds;  $^1\text{H}$  NMR; Chemical shift temperature coefficients; Amide exchange 359
- Hydrogen–deuterium exchange; Secondary structure thermal stability; Thyroid transcription factor 1 homeodomain; Homeodomain; DNA-binding proteins; Protein NMR 397
- In vitro selection; AMP; Heteronuclear NMR; Specific labeling; RNA structure 259
- Influenza virus A NS-1 protein; BPTI–trypsin complex; Heteronuclear relaxation; Heteronuclear multiple-quantum coherence; Bovine pancreatic trypsin inhibitor; Bovine pancreatic ribonuclease A 105
- Inosine-for-guanine substitution; Site-specific labeling of RNA;  $^{15}\text{N}$  labeling of guanine and adenine 55
- Intermolecular NOE; Protein solvation; Organic solvent; Hen egg-white lysozyme; Drug design 441
- Inverse search; BioMagResBank; PDB database; Chemical shift assignment; Protein 101
- Isotope enrichment; Multidimensional NMR spectroscopy; Sequential assignments; Solution structure; Human intestinal fatty acid binding protein 213
- Isotope filtering; TOCSY experiment; Aromatic rings; Tyrosine residues; Solvent exchange 313
- Isotope labelling; Heteronuclear NMR; Chemical shift assignments; Helices; Cytokine; Leukaemia inhibitory factor 113
- $^3\text{J}_{\text{CC}'}\text{Y}$  and  $^3\text{J}_{\text{NC}'}\text{Y}$  scalar couplings;  $\chi_1$  Dihedral angle; Triple-resonance NMR; Quantitative J spectroscopy 409
- Leukaemia inhibitory factor; Isotope labelling; Heteronuclear NMR; Chemical shift assignments; Helices; Cytokine 113
- Magainin; Membrane; Amphipathic helix; Micelle 127
- Mastoparan; Phospholipid bicelle; Membrane-bound peptide 329
- Matrix metalloproteinase; Collagenase; Assignments; Structure; MMP; 3D NMR 11
- MD with time-averaged restraints; T $\Psi$ C-loop; RUMT; RNA/protein recognition; Dynamic NMR refinement 229
- Membrane; Amphipathic helix; Micelle; Magainin 127
- Membrane-bound peptide; Mastoparan; Phospholipid bicelle 329
- Metalloprotein; Gallium; Electron transfer; Putidaredoxin; Cytochrome P450 337
- Methyl;  $^{13}\text{C}$ ; Protein; Dynamics; Relaxation 437

- Methylene-acetal linkage; Genetic algorithm; Distance geometry 25
- Micelle; Magainin; Membrane; Amphipathic helix 127
- MMP; 3D NMR; Matrix metalloproteinase; Collagenase; Assignments; Structure 11
- Modular proteins; Muscle; Fibronectin; Connectin 2
- Multidimensional NMR spectroscopy; Sequential assignments; Solution structure; Human intestinal fatty acid binding protein; Isotope enrichment 213
- Muscle; Fibronectin; Connectin; Modular proteins 2
- $^{15}\text{N}$ ; Superoxide dismutase; Selective labeling; Glutamine 201
- $^{15}\text{N}$  labeling of guanine and adenine; Inosine-for-guanine substitution; Site-specific labeling of RNA 55
- N*-Acetyllactosamine; Oligosaccharide; 3D heteronuclear NMR 47
- NMR assignments; Drug design; Antibiotics resistance; Dihydrofolate reductase 445
- NOE; Chemical shift; Heteronuclear NMR; Staphylokinase; Plasminogen; Resonance assignment; Secondary structure 273
- NOE; Unfolded or partially folded proteins; Heteronuclear, multidimensional NMR 181
- NOESY editing; Spin diffusion; Protein NMR 317
- Nuclear spin relaxation; Rotational diffusion tensor anisotropy; Proteins 287
- Oligosaccharide; 3D heteronuclear NMR; *N*-Acetyllactosamine 47
- Order parameter; Ribonuclease T1; Protein dynamics;  $^{13}\text{C}$  relaxation times; Spectral density function mapping; Conformational exchange 63
- Organic solvent; Hen egg-white lysozyme; Drug design; Intermolecular NOE; Protein solvation 441
- Paramagnetic relaxation; Spectroscopic probe; Copper proteins; Type 1 copper site; Azurin; Electron transfer 299
- PDB database; Chemical shift assignment; Protein; Inverse search; BioMagResBank 101
- Phospholipid bicelle; Membrane-bound peptide; Mastoparan 329
- Plasminogen; Resonance assignment; Secondary structure; NOE; Chemical shift; Heteronuclear NMR; Staphylokinase 273
- Primary amide; Stereospecific assignment; HMQC spectroscopy; Dihedral angle 306
- Principal component analysis; Protein structure; SH3 domain; Spectrin 347
- Protein; Dynamics; Relaxation; Methyl;  $^{13}\text{C}$  437
- Protein; Inverse search; BioMagResBank; PDB database; Chemical shift assignment 101
- Protein deuteration; Spin diffusion; Heteronuclear relaxation; Structural analysis 79
- Protein dynamics;  $^{13}\text{C}$  relaxation times; Spectral density function mapping; Conformational exchange; Order parameter; Ribonuclease T1 63
- Protein NMR; Hydrogen-deuterium exchange; Secondary structure thermal stability; Thyroid transcription factor 1 homeodomain; Homeodomain; DNA-binding proteins 397
- Protein NMR; NOESY editing; Spin diffusion 317
- Protein solvation; Organic solvent; Hen egg-white lysozyme; Drug design; Intermolecular NOE 441
- Protein structure; SH3 domain; Spectrin; Principal component analysis 347
- Proteins; Nuclear spin relaxation; Rotational diffusion tensor anisotropy 287
- Proteins; Triple resonance NMR spectroscopy; Sequential assignment 94
- Putidaredoxin; Cytochrome P450; Metalloprotein; Gallium; Electron transfer 337
- Quantitative J correlation; Stereospecific assignment; Ubiquitin;  $\chi_1$  Angle; Calmodulin; Carbon-nitrogen J coupling 323
- Quantitative J spectroscopy;  $^3\text{J}_{\text{CC}'}'$  and  $^3\text{J}_{\text{NC}'}'$  scalar couplings;  $\chi_1$  Dihedral angle; Triple-resonance NMR 409
- Relaxation;  $\phi$  Angle; HIV-1 Nef; Ubiquitin; Carbon-carbon J coupling; HOHAHA; TOCSY 207
- Relaxation; Methyl;  $^{13}\text{C}$ ; Protein; Dynamics 437
- Resonance assignment; Secondary structure; NOE; Chemical shift; Heteronuclear NMR; Staphylokinase; Plasminogen 273
- Resonance assignments; Degenerate chemical shifts; *Desulfovibrio vulgare* flavodoxin; Triple-resonance NOESY 371
- Ribonuclease T1; Protein dynamics;  $^{13}\text{C}$  relaxation times; Spectral density function mapping; Conformational exchange; Order parameter 63
- RNA structure; In vitro selection; AMP; Heteronuclear NMR; Specific labeling 259
- RNA/protein recognition; Dynamic NMR refinement; MD with time-averaged restraints; T $\Psi$ C-loop; RUMT 229
- Rotational diffusion tensor anisotropy; Proteins; Nuclear spin relaxation 287
- RUMT; RNA/protein recognition; Dynamic NMR refinement; MD with time-averaged restraints; T $\Psi$ C-loop 229
- Secondary structure; Heme ring current effect; Carbon chemical shifts; Cytochrome c 389
- Secondary structure; NOE; Chemical shift; Heteronuclear NMR; Staphylokinase; Plasminogen; Resonance assignment 273
- Secondary structure; Uteroglobin; h-cc10kDa 35
- Secondary structure thermal stability; Thyroid transcription factor 1 homeodomain; Homeodomain; DNA-binding proteins; Protein NMR; Hydrogen-deuterium exchange 397
- Selective labeling; Glutamine;  $^{15}\text{N}$ ; Superoxide dismutase 201
- Sequential assignment; Proteins; Triple resonance NMR spectroscopy 94
- Sequential assignments; Solution structure; Human intestinal fatty acid binding protein; Isotope enrichment; Multidimensional NMR spectroscopy 213
- SH3 domain; Spectrin; Principal component analysis; Protein structure 347
- Sialyl Lewis<sup>x</sup>; 3D TOCSY-trNOESY; 1D TOCSY-trNOESY; 1D trNOESY-TOCSY; trNOE; trROE; E-selectin 423
- Simulated annealing; ssDNA binding protein; Structure calculation; Floating chirality; Stereospecific assignment 245
- Site-specific labeling of RNA;  $^{15}\text{N}$  labeling of guanine and adenine; Inosine-for-guanine substitution 55
- Solution structure; Human intestinal fatty acid binding protein; Isotope enrichment; Multidimensional NMR spectroscopy; Sequential assignments 213

- Solvent exchange; Isotope filtering; TOCSY experiment; Aromatic rings; Tyrosine residues 313
- Specific labeling; RNA structure; In vitro selection; AMP; Heteronuclear NMR 259
- Spectral density function mapping; Conformational exchange; Order parameter; Ribonuclease T1; Protein dynamics;  $^{13}\text{C}$  relaxation times 63
- Spectrin; Principal component analysis; Protein structure; SH3 domain 347
- Spectroscopic probe; Copper proteins; Type 1 copper site; Azurin; Electron transfer; Paramagnetic relaxation 299
- Spin diffusion; Heteronuclear relaxation; Structural analysis; Protein deuteration 79
- Spin diffusion; Protein NMR; NOESY editing 317
- Spin echo; Amide exchange; Bound water; Acyl carrier protein; Translational diffusion 136
- SsDNA binding protein; Structure calculation; Floating chirality; Stereospecific assignment; Simulated annealing 245
- Staphylokinase; Plasminogen; Resonance assignment; Secondary structure; NOE; Chemical shift; Heteronuclear NMR 273
- Stereospecific assignment; HMQC spectroscopy; Dihedral angle; Primary amide 306
- Stereospecific assignment; Simulated annealing; ssDNA binding protein; Structure calculation; Floating chirality 245
- Stereospecific assignment; Ubiquitin;  $\chi_1$  Angle; Calmodulin; Carbon-nitrogen J coupling; Quantitative J correlation 323
- Structural analysis; Protein deuteration; Spin diffusion; Heteronuclear relaxation 79
- Structure; MMP; 3D NMR; Matrix metalloproteinase; Collagenase; Assignments 11
- Structure calculation; Floating chirality; Stereospecific assignment; Simulated annealing; ssDNA binding protein 245
- Superoxide dismutase; Selective labeling; Glutamine;  $^{15}\text{N}$  201
- T $\Psi$ C-loop; RUMT; RNA/protein recognition; Dynamic NMR refinement; MD with time-averaged restraints 229
- Three-dimensional NMR; Automated polypeptide resonance assignment 151
- Thyroid transcription factor 1 homeodomain; Homeodomain; DNA-binding proteins; Protein NMR; Hydrogen-deuterium exchange; Secondary structure thermal stability 397
- TOCSY; Relaxation;  $\phi$  Angle; HIV-1 Nef; Ubiquitin; Carbon-carbon J coupling; HOHAHA 207
- TOCSY experiment; Aromatic rings; Tyrosine residues; Solvent exchange; Isotope filtering 313
- Translational diffusion; Spin echo; Amide exchange; Bound water; Acyl carrier protein 136
- Triple-resonance NMR; Backbone assignment; Glutamine-binding protein 167
- Triple-resonance NMR; Quantitative J spectroscopy;  $^3J_{\text{CC}\gamma}$  and  $^3J_{\text{NC}\gamma}$  scalar couplings;  $\chi_1$  Dihedral angle 409
- Triple resonance NMR spectroscopy; Sequential assignment; Proteins 94
- Triple-resonance NOESY; Resonance assignments; Degenerate chemical shifts; *Desulfovibrio vulgaris* flavodoxin 371
- TrNOE; trROE; E-selectin; sialyl Lewis $^x$ ; 3D TOCSY-trNOESY; 1D TOCSY-trNOESY; 1D trNOESY-TOCSY 423
- TrROE; E-selectin; sialyl Lewis $^x$ ; 3D TOCSY-trNOESY; 1D TOCSY-trNOESY; 1D trNOESY-TOCSY; trNOE 423
- Type 1 copper site; Azurin; Electron transfer; Paramagnetic relaxation; Spectroscopic probe; Copper proteins 299
- Tyrosine residues; Solvent exchange; Isotope filtering; TOCSY experiment; Aromatic rings 313
- Ubiquitin;  $\chi_1$  Angle; Calmodulin; Carbon-nitrogen J coupling; Quantitative J correlation; Stereospecific assignment 323
- Ubiquitin; Carbon-carbon J coupling; HOHAHA; TOCSY; Relaxation;  $\phi$  Angle; HIV-1 Nef 207
- Unfolded or partially folded proteins; Heteronuclear, multidimensional NMR; NOE 181
- Uteroglobin; h-cc10kDa; Secondary structure 35
