

Key word index Volume 29, 2004

- α -actinin-4, 533
 α -adaptin ear-domain, 441
 α -helix, 271
ab initio, 477
accessory proteins, 205
actin binding, 429
Ada protein, 447
adiabatic barrier, 377
adiabatic pulse, 167
AfaD, 411
AfaE, 409
Afimbrial sheath, 409, 411
AIC, 243
alcaligenes, 541
algorithms for protein structure determination, 223
aligned media, 259
alpha-beta protein, 549
Alzheimer's disease, 425, 525
amyloid fibril, 525
antibiotic resistance, 433
antifreeze protein, 139
AP-2, 441
ApaG protein, 423
Apg family, 415
apo-S100P, 399
apolipoprotein E, 419
Arabidopsis thaliana, 205, 207
arsenate reductase, 459
arsenite, 459
Asf1, 413
assignment, 1, 425
asymmetric methylarginines, 463
At5g22580, 387
ATP binding, 437
ATP synthase, 439
automation with ATNOS and CANDID, 403
autophagy, 415
- β -dystroglycan/MAGI-1/ β -catenin complex, 539
BACE, 425
backbone assignment, 407
backbone resonance assignment, 537
bacterial mercury resistance system, 457
beta-sheet breaker peptide, 525
BfpA, 427
- BIC, 243
bicelle, 259, 299
brownian dynamics, 21
bundlin, 427
Burkholderia pseudomallei, 215
- ^{13}C - ^{13}C cross-relaxation, 151
C345C, 217
C38 methylation, 447
calcineurin, 531
calcium-binding protein, 461
calmodulin, 461, 531
CAP, 73
carboxyl-terminal domain, 419
cbEGF, 443
CD44, 97
Center for Eukaryotic Structural Genomics, 387
CESG, 387
chaperonin, 209
characteristic ratio, 517
chemical exchange, 187
chemical shift, 1, 65, 429
– assignment, 217, 439
– correlation, 167
– perturbation spectra, 491
– tensor, 281
chromatin remodelling, 413
class A β -lactamase, 433
Clq-like domain, 91
cofilin/ADF, 429
coherence-order selective, 37
complement, 217
complex mixture, 505
conformational change, 187
conformational search, 223
conserved hypothetical protein, 453
copper, 541
– metallochaperone, 211
correlation, 477
correlation spectroscopy, 545
CP-MAS, 281
CPMG, 187
cross-correlated dipolar spin relaxation, 369
cyclase-associated protein, 73
cytokine, 543

- receptor, 407
- cytoskeleton, 429
- 3D NMR, 407
- DAEC, 409, 411
- DAF, 409
- DARR, dipolar assisted rotational resonance, 11
- DDAH, 463
- denatured protein, 517
- detergent, 299
- deuteration, 103
- deuterium isotope effect, 65
- DFT, 477
- DHPC, 299
- diffusion, 505
- diffusion-edited spectroscopy, 505
- dipolar coupling, 271, 339
- dissociation constant K_d , 491
- disulfide bond, 339
- DNA, 65
 - repair, 413
- domain III, 535
- DraD, 411
- Duchenne muscular dystrophy, 539
- E. coli* thioredoxin, 175
- EF-hands, 461
- elastic fibres, 91
- EMILIN, 91
- endocytosis, 205
- enterobacterial common antigen, 199
- ENTH domain, 205
- envelope protein, 445, 535
- EPEC, 427
- exact solutions for backbone dihedral angles, 223
- exact solutions for internuclear vectors, 223
- FABP, 553
- FELIX-Autoscreen program, 491
- FIREMAT, 281
- flavivirus, 445, 535
- FN III domain, 407
- folic acid, 547
- gastric cancer, 95
- GFT, 57
- GFT-NMR, 467
- global fold determination, 223
- glutaredoxin, 85
- GPCR, G protein-coupled receptor, 11
- growth factor, 95
- guanine nucleotide exchange factor, 215
- ^1H - ^{15}N HSQC spectroscopy, 491
- Hadamard spectroscopy, 57
- Haemophilus influenzae*, 101, 213
- hath-domain, 95
- hCLP, 455
- HDGF, 95
- heterologous protein expression, 199
- heteronuclear correlation, 37
- heteronuclear cross-polarization, 37
- heteronuclear NMR, 91, 93, 415, 457, 463, 537
- high-throughput NMR methods, 223
- high-throughput screening, 491
- hNotch-1, 443
- homodimer, 387, 399
- HSQC, 505
- hyaluronan, 97
- hydration, 299
- Hydrogen bond, 65
 - stability, 309
- hydrogen-deuterium exchange, 309
- hypothesis testing, 243
- IL-6R, 407
- inhibitors of fibril formation, 525
- insect, 461
- integrin, 411
- inversion-recovery, 351
- iron sulfur cluster assembly, 213
- KdpB, 437
- La antigen, 449
- La motif, 449
- lanthanide ion, 339
- large molecular structures, 289
- LECT2, 543
- ligand binding region, 443
- ligand titration experiment, 491
- ligand-receptor complex, 103
- Link module, 97
- lysolipid, 299
- MAGI-1/BAP-1, 539
- MAP-LC3, 415
- MAS, magic angle spinning, 11
- matrilysin, 537
- membrane protein, 439
- MerB, 457
- MerB/Hg/DTT, 457

- metal binding tag, 175
- methenyltetrahydrofolate synthetase, 547
- methyl group, 369
 - dynamics, 363
- methyl rotation, 377
- microtubule-associated protein light chain-3, 415
- MMP7, 537
- model selection, 243
- molecular alignment, 339
- molecular dynamics simulation, 377
- molecular interaction, 531
- multi-domain proteins, 21
- multidimensional NMR experiments, 467
- multiple sclerosis, 545
- muscle, 461
- myelin basic protein, 545

- N-acetylated carbohydrate, 199
- NADPH oxidase, 451
- natural abundance ¹³C NMR, 139
- nickel, 175
- nitric oxide, 463
- nitrous oxide reductase, 211
- NMR, 73, 85, 95, 103, 187, 213, 217, 259, 299, 309, 339, 409, 411, 423, 425, 427, 429, 451, 461, 477, 545
 - assignment, 97, 99, 101, 205, 207, 209, 215, 419, 433, 437, 445, 447, 449, 457, 533, 535, 539
 - chemical shift assignment, 453
 - correlation time, 377
 - filtration, 505
 - nuclear magnetic resonance, 11
 - relaxation, 21, 243, 363
 - resonance assignments, 211, 441, 459
 - structure, 391, 395, 399
 - structure determination, 403
- NOE, 151
- Northeast Structural Genomics Consortium, 549
- NOS isoforms, 463
- NosL, 211
- NTR, 217
- nucleotide binding domain, 437

- order parameter, 369

- P-type ATPase, 437
- p47^{phox}, 451
- paramagnetic NMR, 175
- paramagnetic relaxation enhancement, 351
- paramagnetic restraints, 351
- partially deuterated proteins, 91
- PDS, proton-driven spin diffusion, 11

- peak picking, 491
- peak shape, 491
- peanut allergen, 93
- persistence length, 517
- phosphatase, 417
- polymorphs, 281
- prediction of protein mobility, 363
- PRL-1, 417
- probability density function, 1
- protein, 85
 - aggregation, 525
 - backbone, 1
 - backbone dynamics, 363
 - derivatization, 351
 - flexibility, 21, 377
 - hydration, 395
 - kinematics, 223
 - NMR, 531
 - phosphatase 2B, 531
 - purification, 199
 - resonance assignment, 57
 - stability, 309
 - structure, 175, 309
 - structure determination, 467
- protein-protein complex, 325
- protein-protein interactions, 533
- pseudoazurin, 541
- PTP(CaaX), 417
- PTPase, 417
- PWWP, 95

- quaternary carbon, 477

- 434 repressor, 395
- R₂, 187
- random-flight chain, 517
- RAP, 271
- RD-NMR, 467
- receptor-associated protein, 271
- receptor/ligand interaction, 491
- REDOR, rotational echo double resonance, 11
- reduced dimensionality, 57
- reduced-dimensionality NMR, 549
- relaxation, 299
- reorientational mode dynamics, 21
- residual dipolar couplings, 223, 259, 325, 387, 441, 517
- residue-specific isotope labeling, 289
- resonance assignments, 167, 417, 451, 455, 463, 543
- RFDR, radiofrequency driven recoupling, 11
- Rho GTPase, 215

- rigid body docking, 325
- RNA, 477
 - binding protein, 391
- RRM, 449

- 2S albumin, 93
- σ -factor, 99
- S² order parameters, 363
- S-cysteamine-EDTA, 351
- SAR by NMR, 491
- saturation transfer, 325
- SAV1595, 391
- Schistosoma mansoni*, 553
- self diffusion, 299
- sensitivity-enhancement, 37
- separation of global and local motions, 21
- sequence-specific resonance assignment, 93
- SH3 domain, 451
- side chain dynamics, 139, 151, 363
- simulated annealing, 325
- Sm14 protein, 553
- SNase, 377
- solid state NMR, 167, 281
- solution NMR, 289
- solution state NMR spectroscopy, 525
- spectrin repeats, 533
- spin-spin coupling, 477
- spin-state-selective excitation, 37
- Spred2 EVH1 domain, 435
- stable-isotope labeling, 289
- staphylococcal nuclease, 377
- structural genomics, 1, 101, 207, 213, 223
- structural proteomics, 99, 403, 453
- structure, 73, 85
- subtilisin PB92
- sulfonamide hydroxamate-type inhibitor, 537
- systematic search, 223

- T4 phage, 85
- tandem WW domains, 539

- TEM-1, 433
- TGF, 103
- thermosome, 209
- Thermotoga maritima*, 99, 403
- Thermotoga martima*, 453
- TM, transmembrane, 11
- TOBSY, 167
- torsion angle, 1
- transferred residual dipolar coupling, 525
- transforming growth factor-beta, 103
- triple module construct, 443
- triple resonance experiments, 91, 97, 547
- triple resonance NMR, 455
- Troponin C, 461
- TROSY, 37, 91, 103, 439
- trRDC, 525
- type II receptor, 103
- type III secretion, 215

- Ubbelohde effect, 309
- uniform deuterium labeling, 289
- UPEC, 409, 411
- UPF0044, 391

- vaccine, 553
- VACP, variable amplitude cross polarization, 11
- valence chain, 517
- valinomycin, 281
- variable-angle sample spinning, 259
- VHS domain, 205
- vibrational potential well, 65
- virulence protein, 215

- Watson-Crick, 65
- West Nile virus, 445

- Xanthomonas axonopodis* pv. *citri*, 423

- YhbY, 391
