EDITORIAL

SPECIAL TOPICS ISSUES OF THE JOURNAL OF CARBOHYDRATE CHEMISTRY

With publication of this issue a new and attractive feature of the Journal of Carbohydrate Chemistry is being introduced, "Special Topics Issues". The Editors will continue on a regular basis to assemble certain Special Topics Issues of the Journal targetted at rapidly developing areas of carbohydrate chemistry. Each Special Topics Issue, in general, will be divided into two parts: a concise, current review by an expert of a selected topic, and a series of papers on this topic describing the most recent developments in leading research groups. This issue is devoted to the chemistry of carbohydrates containing the exceedingly reactive trifluoromethylsulfonyloxy (triflyoxy) group.

The Editors are interested in receiving suggestions from readers of the Journal concerning possible topics for future Special Topics Issues. If you would like to suggest a particular subject, please contact:
