This article may be used for research, teaching and private study purposes. Any substantial or systematic reproduction, re-distribution, re-selling, loan or sub-licensing, systematic supply or distribution in any form to anyone is expressly forbidden.

The publisher does not give any warranty express or implied or make any representation that the contents will be complete or accurate or up to date. The accuracy of any instructions, formulae and drug doses should be independently verified with primary sources. The publisher shall not be liable for any loss, actions, claims, proceedings, demand or costs or damages whatsoever or howsoever caused arising directly or indirectly in connection with or arising out of the use of this material.

**19th International Carbohydrate Symposium to be held August 9-14, 1998 in San Diego, California**

The scientific program will cover those aspects of carbohydrate science described under the headings below. The Symposium will include Plenary Lectures, Invited Lectures, and contributed papers. Approximately 100 of the contributed papers will be selected for oral presentation; the remainder will be presented in poster sessions. The presentations will be grouped under the following general headings:

**Structure and Analysis:** primary, secondary, and higher order structure: conformational analysis; spectroscopic and instrumental analysis

**Synthesis:** chemical and enzymatic synthetic methods; synthesis of carbohydrates, nucleosides, nucleotides, antibiotics involving carbohydrate moieties; carbohydrates as chiral synthons

**Biological and Medicinal Chemistry:** biological function; metabolic role; pharmaceutical and therapeutic implications

**Biotechnology, Ecology, and Industry:** commercial applications of carbohydrates; methods of production; novel or unique industrial ecological developments
