

# Subject Index

## A

- Acids, the mechanism of double-bond isomerization of olefins on solid, D. M. BROUWER, 22
- Adsorbed isotopic CO molecules. On the energetic heterogeneity of clean evaporated nickel films studied by means of the place change between, R. SUHRMANN *et al.*, 208
- Adsorption of ammonia. The nature of silica-alumina surfaces. I. Thermodynamics of, ALFRED CLARK *et al.*, 244
- of gases, effects on the low-field magnetization of nickel-on-silica catalysts, J. W. GEUS *et al.*, 8
- successive, of gases on tungsten. Nitrogen and carbon monoxide at room temperature, F. RICCA *et al.*, 458
- of H<sub>2</sub>S on alumina at low coverages, A. J. DE-ROSSET *et al.*, 235
- of lauric acid on aluminum oxides and hydroxides. Study of the nature of surfaces with polar molecules. I. J. H. DE BOER *et al.*, 1
- Adsorption calorimetry on granulated catalysts. A study of adsorption processes relating to isopropanol dehydrogenation, ROBERT L. GALE *et al.*, 32
- Adsorption layers composite on tungsten and platinum. Field-emission study, W. J. M. ROOTSAERT *et al.*, 416
- Alumina and silica gels: Control of pore volume and pore size distribution by addition of water-soluble organic polymers, D. BASMAJIAN *et al.*, 547
- Alumina: Catalyst and support. XVI. Aromatization and dehydroisomerization of branched C<sub>8</sub>-C<sub>9</sub> hydrocarbons over "nonacidic" chromia-alumina catalyst, HERMAN PINES AND SIGMUND M. CSICSERY, 313
- XVII. Dehydrocracking of hydrocarbons over "nonacidic" chromia-alumina catalyst. SIGMUND M. CSICSERY AND HERMAN PINES, 329
- at low coverages. Adsorption of H<sub>2</sub>S on, A. J. DEROSSET, C. G. FINSTROM, AND C. J. ADAMS, 235
- Aluminosilicates, catalysis by crystalline. I. Cracking of hydrocarbon types over sodium and calcium "X" zeolites, V. J. FRILETTE *et al.*, 301
- II. Molecular-shape selective reactions, P. B. WEISZ *et al.*, 307
- Aluminum oxides and hydroxides. Study of the nature of surfaces with polar molecules. I. Adsorption of lauric acid on, J. H. DE BOER *et al.*, 1

- Ammonia, nitrogen, and hydrogen, chemisorption on nickel and iron films. Surface potential measurements, P. M. GUNDRY *et al.*, 363
- Ammonia. Thermodynamics of adsorption of. Nature of silica-alumina surfaces. I., ALFRED CLARK *et al.*, 244
- Ammonium perchlorate, *see* Solid phase reactions
- Aromatic hydrocarbons, oxidation by silica-alumina, D. M. BROUWER, 372
- Aromatization and dehydroisomerization of branched C<sub>8</sub>-C<sub>9</sub> hydrocarbons over "non-acidic" chromia-alumina catalyst. Alumina: Catalyst and support. XVI., HERMAN PINES AND SIGMUND M. CSICSERY, 313

## C

- Calorimetry, adsorption, on granulated catalysts. Study of adsorption processes relating to isopropanol dehydrogenation, ROBERT L. GALE *et al.*, 32
- Carbon monoxide. Successive adsorption of gases on tungsten, nitrogen and, at room temperature, F. RICCA *et al.*, 458
- Catalysis, by metals (book review) by, G. C. BOND, reviewed by R. G. MEISENHEIMER, 564
- Cation radicals, formation on the surface of silica-alumina catalysts, W. KEITH HALL, 53
- Chemisorption of ammonia, nitrogen, and hydrogen. Surface potential measurements on nickel and iron films during, P. M. GUNDRY *et al.*, 363
- of hydrogen and electrical conductivity of zinc oxide semiconductors, A. CIMINO *et al.*, 275
- of hydrogen sulfide, methyl sulfide, and cyclohexene on supported nickel catalysts, I. E. DEN BESTEN AND P. W. SELWOOD, 93
- 2-Chloropurine two-way oxidation by mammalian xanthine oxidase. Mechanism of, FELIX BERGMANN AND HANNA UNGAR-WARON, 47
- Chromia-alumina and chromia-silica-alumina preparations. Oxidation and leaching of some, ALCUIN F. GREMILLION AND WALTER R. KNOX, 216
- Chromia-alumina catalyst. *see* Alumina: Catalyst and support
- Chromia-alumina catalysts. Physical properties of coprecipitated, CHARLES P. POOLE *et al.*, 407
- Chromium, promoting effect on a sprayed-nickel catalyst, DONALD N. FLETCHER AND HOWARD F. RASE, 389
- CO molecules, adsorbed, isotopic. Energetic heterogeneity of clean evaporated nickel

- films studied by means of the place change between, R. SUHRMANN *et al.*, 208
- Contaminants of cracking catalysts. Mechanism for deactivation of trace metal. R. G. MEISENHEIMER, 356
- Cracking catalysts, *see* Contaminants
- Cracking of hydrocarbon types over sodium and calcium "X" zeolites. Catalysis by crystalline aluminosilicates. I., V. J. FRILETTE *et al.*, 301
- Crotonaldehyde, catalytic vapor phase oxidation to maleic acid in a fluidized bed. Vapor phase oxidation of, S. K. BHATTACHARYYA AND A. K. KAR, 293
- CuO, uniformity of supported, from rate of reduction with hydrogen, HERVEY H. VOGEL AND LELAND T. ATKINS, 171
- Cupric ions promoting effect on ferric ion catalyzed decomposition of hydrogen peroxide, MORDECHAI L. KREMER, 351
- Cupric oxide catalysts. Decomposition of nitrous oxide on some doped, I. BATTA *et al.*, 103  
effect of doping on thermal decomposition and explosion of ammonium perchlorate. Catalysis of solid phase reactions, F. SOLYMOSSI AND E. KRIX, 468
- Cyclohexene, *see* Chemisorption
- D**
- Deactivation of trace metal contaminants of cracking catalysts. Mechanism for, R. G. MEISENHEIMER, 356
- Defects in the catalytic activity of ionic crystals. Role of ionic point, GEORGE SIMKOVICH AND CARL WAGNER, 521
- Dehydrocracking of hydrocarbons over "non-acidic" chromia-alumina catalyst. Alumina: Catalyst and support. XVII., SIGMUND M. CSICSERY AND HERMAN PINES, 329
- Dehydrocyclization of hydrocarbons. Role of dehydrogenation activity in the catalytic isomerization and, J. H. SINFELT *et al.*, 481
- Dehydrogenation, adsorption calorimetry on granulated catalysts. A study of adsorption processes relating to isopropanol, ROBERT L. GALE *et al.*, 32  
of isopropyl alcohol on ZnO-Cr<sub>2</sub>O<sub>3</sub> catalysts. Semiconductivity and catalytic activity, JUAN F. GARCIA DE LA BANDA, 136
- Dehydrogenation activity in the catalytic isomerization and dehydrocyclization of hydrocarbons, J. H. SINFELT *et al.*, 481
- Dehydroisomerization of branched C<sub>6</sub>-C<sub>8</sub> hydrocarbons over "nonacidic" chromia-alumina catalyst. Alumina: Catalyst and support. XVI., HERMAN PINES AND SIGMUND M. CSICSERY, 313
- Diffusion effects, intraparticle, in complex systems of first order reactions. I. The effects in single particles, JAMES WEI, 526  
II. The influence of diffusion on the performance of chemical reactors, JAMES WEI, 538
- Diffusivity of porous-oxide-gel derived catalyst particles, P. B. WEISZ AND A. B. SCHWARTZ, 399
- Doped cupric oxide catalysts. Decomposition of nitrous oxide on, I. BATTA *et al.*, 103
- Doping of cupric oxide catalyst effect on thermal decomposition and explosion of ammonium perchlorate. Catalysis of solid phase reactions, F. SOLYMOSSI AND E. KRIX, 468
- Double-bond isomerization of olefins on solid acids. Mechanism of, D. M. BROUWER, 22
- E**
- Electrical conductivity of zinc oxide semiconductors. Hydrogen chemisorption and, A. CIMINO *et al.*, 275
- Electrolytic charging of nickel with hydrogen. Effect of catalytic poisons on the production of nickel hydride by, H. JARMOLOWICZ AND M. SMIALOWSKI, 165
- Ethylene dichloride. Interaction of oxygen and, with silver surfaces, ROBERT G. MEISENHEIMER AND J. NORTON WILSON, 151
- Exchange, catalytic, with deuterium of polymethylcyclopentanes on metal films. Evidence for  $\pi$ -bonded intermediates, F. G. GAULT *et al.*, 255
- F**
- Ferric ion catalyzed decomposition of hydrogen peroxide. Promoting effect of cupric ions, MORDECHAI L. KREMER, 351
- Field-emission study of composite adsorption layers on tungsten and platinum, W. J. M. ROOTSAERT *et al.*, 416
- Fischer tropesch synthesis. Study on formation mechanism of methane by hydrocracking in, HERBERT KOELBEL *et al.*, 156
- Formaldoxime, *see* Oxide catalysts
- Free-metal surface area of palladium catalysts. Determination of, J. J. F. SCHOLTEN AND A. VAN MONTFOORT, 85
- G**
- Gas-chromatographic separation of ortho- and para-hydrogen on molecular sieves: Analysis, preparation, and measurement of catalytic conversion and of adsorption, L. BACHMANN *et al.*, 113

## H

- Heat and mass transfer in methanol synthesis—optimum operating conditions of the reactors, I. PASQUON AND M. DENTE, 508
- Heterogenicity, energetic of clean evaporated nickel films studied by means of place change between adsorbed isotopic CO molecules, R. SUHRMANN *et al.*, 208
- H<sub>2</sub>S, adsorption on alumina at low coverages, A. J. DE ROSSET *et al.*, 235
- Hydrocarbons. Role of dehydrogenation activity in catalytic isomerization and dehydrocyclization, J. H. SINFELT *et al.*, 81
- Hydrocracking in Fischer tropesch synthesis. Study on the formation mechanism of methane by, HERBERT KOELBEL *et al.*, 156
- Hydrogen, kinetics of isotope exchange between—and liquid ammonia on heterogeneous catalysts, R. HAUL AND D. BLENNEMANN, 432 and oxygen. Catalyzed reaction of, P. G. ASHMORE AND B. J. TYLER, 39 chemisorbed on zinc oxide. Infrared spectrum of, R. P. EISCHENS *et al.*, 180 chemisorption and electrical conductivity of zinc oxide semiconductors, A. CIMINO *et al.*, 275 ortho-, *see* Ortho-hydrogen surface potential measurements on nickel and iron films during the chemisorption of ammonia, nitrogen, and, P. M. GUNDRY *et al.*, 363
- Hydrogen peroxide, ferric ion catalyzed decomposition. Promoting effect of cupric ions, MORDECHAI L. KREMER, 351
- Hydrogen sulfide, *see* Chemisorption

## I

- Induction of catalytic activity by neutron irradiation of silica and silica-alumina, R. J. KIKOVSKY AND P. B. WEISZ, 345
- Infrared spectrum of hydrogen chemisorbed on zinc oxide, R. P. EISCHENS *et al.*, 180
- Infrared studies of CO, O<sub>2</sub>, and CO<sub>2</sub> gases and their interaction products, chemically adsorbed on nickel oxide, MICHEL COURTOIS AND STANISLAS JEAN TEICHNER, 121
- Intraparticle diffusion effects in complex systems of first order reactions. I. Effects in single particles, JAMES WEI, 526
- II. Influence of diffusion on performance of chemical reactors, JAMES WEI, 538
- Ionic point defects, role in catalytic activity of ionic crystals, GEORGE SIMKOVICH AND CARL WAGNER, 521
- Iron and nickel films. Surface potential measurements during chemisorption of ammonia,

- nitrogen, and hydrogen, P. M. GUNDRY *et al.*, 363
- Irradiated zinc oxide. Conversion of isopropyl alcohol to acetone on, JOSEPH C. KURIAKOSE AND M. CLARE MARKHAM, 498
- Isomerization and dehydrocyclization of hydrocarbons. Role of dehydrogenation activity in the catalytic, J. H. SINFELT *et al.*, 481 double-bond of olefins on solid acids. Mechanism of, D. M. BROUWER, 22
- Isopropanol dehydrogenation. Adsorption calorimetry on granulated catalysts. Study of adsorption processes relating to, ROBERT L. GALE *et al.*, 32
- Isopropyl alcohol, conversion to acetone on irradiated zinc oxide, JOSEPH C. KURIAKOSE AND M. CLARE MARKHAM, 498 dehydrogenation on ZnO-Cr<sub>2</sub>O<sub>3</sub> catalysts. Semiconductivity and catalytic activity, JUAN F. GARCIA DE LA BANDA, 136
- Isotope exchange between hydrogen and liquid ammonia on heterogeneous catalysts. Kinetics, R. HAUL AND D. BLENNEMANN, 432

## K

- Kinetic investigation of the reaction of nickel carbide with hydrogen, A. K. GALWEY, 227
- Kinetics and catalysis, abstracts. Academy of Science, U.S.S.R., Vol. III, Issue 1, Jan.-Feb., 1962, 194
- Vol. III, Issue 2, March-April 1962, pp. 175-180, 395
- Vol. III, Issue 3, May-June 1962, pp. 305-313, 484
- Vol. III, Number 4, July-August, 1962, pp. 470-480, 564
- Kinetics of isotope exchange between hydrogen and liquid ammonia on heterogeneous catalysts, R. HAUL AND D. BLENNEMANN, 432

## L

- Lauric acid, adsorption on aluminum oxides and hydroxides. Study of nature of surfaces with polar molecules, I., J. H. DEBOER *et al.*, 1
- Liquid ammonia. Kinetics of isotope exchange between hydrogen and—on heterogeneous catalysts, R. HAUL AND D. BLENNEMANN, 432
- Liquid phase hydrogenation and decomposition. Reactions of the pentacyanocobaltate (II) ion, II., B. DE VRIES, 489

## M

- Magnetization of nickel-on-silica catalysts. Effects of adsorption of gases on the low-field, J. W. GEUS *et al.*, 8
- Metal, trace contaminants of cracking catalysts.

- Mechanism for deactivation, R. G. MEISENHEIMER, 356
- Metal films. Catalytic exchange with deuterium of polymethylcyclopentanes on. Evidence for  $\pi$ -bonded intermediates, F. G. GAULT *et al.*, 255
- evaporated. Structure and properties, J. R. ANDERSON *et al.*, 443
- Metals, catalysis by patterns of behavior, G. C. BOND, G. WEBB *et al.*, 74
- Metals, catalytic, supported platinum on silica gel. Particle size determination, C. R. ADAMS *et al.*, 336
- Methane, formation mechanism by hydrocracking in the Fischer tropesch synthesis, HERBERT KOELBEL *et al.*, 156
- Methanol synthesis, heat and mass transfer in—optimum operating conditions of the reactors, I. PASQUON AND M. DENTE, 508
- Methyl sulfide, *see* Chemisorption
- Molecular shape selective reactions. Catalysis by crystalline aluminosilicates. II., P. B. WEISZ *et al.*, 307
- Molecular sieves: Gas-chromatographic separation of ortho- and parahydrogen on—analysis, preparation, and measurement of catalytic conversion and of adsorption, L. BACHMANN *et al.*, 113

## N

- Neutron irradiation of silica and silica-alumina. Induction of catalytic activity by, R. J. MIKOVSKY AND P. B. WEISZ, 345
- Nickel and iron films. Surface potential measurements during the chemisorption of ammonia, nitrogen, and hydrogen, P. M. GUNDRY *et al.*, 363
- Nickel carbide reaction with hydrogen. Kinetic investigation, A. K. GALWEY, 227
- Nickel catalysts, *see* Chemisorption, chromium
- Nickel films. Energetic heterogeneity of clean evaporated. Studied by means of place change between adsorbed isotopic CO molecules, R. SUHRMANN *et al.*, 208
- Nickel hydride, production, by electrolytic charging of nickel with hydrogen. Effect of catalytic poisons, H. JARMOLOWICZ AND M. SMIALOWSKI, 165
- Nickel-on-silica catalysts. Effects of adsorption of gases on low-field magnetization of, J. W. GEUS *et al.*, 8
- Nickel oxide. Infrared studies of CO, O<sub>2</sub>, and CO<sub>2</sub> gases and their interaction products chemically adsorbed on, MICHEL COURTOIS AND STANISLAS JEAN TEICHNER, 121
- Nickel with hydrogen, *see* Nickel hydride

- Nitrogen and carbon monoxide at room temperature, *see* Tungsten
- Nitrogen and hydrogen, *see* Surface potential measurements
- Nitrous oxide decomposition on doped cupric oxide catalysts, I. BATTÀ *et al.*, 103

## O

- Ortho- and parahydrogen. Gas-chromatographic separation on molecular sieves: Analysis, preparation, and measurement of catalytic conversion and of adsorption, L. BACHMANN *et al.*, 113
- Ortho-hydrogen low-temperature conversion over supported oxides and metals, NORIAKI WAKAO *et al.*, 62
- Oxidation and leaching of some chromia-alumina and chromia-silica-alumina preparations, ALCUIN F. GREMILLION AND WALTER R. KNOX, 216
- Oxidation of aromatic hydrocarbons by silica-alumina, D. M. BROUWER, 372
- of crotonaldehyde to maleic acid in a fluidized bed. Catalytic vapor phase, S. K. BHATTACHARYYA AND A. K. KAR, 293
- of 2-Chloropurine, *see* 2-Chloropurine
- Oxide catalysts. Decomposition of formaldoxime by, GEORGE-MARIA SCHWAB AND VOLKMAR LEUTE, 192
- Oxides and metals, supported, *see* Ortho-hydrogen
- Oxygen. Catalyzed reaction of hydrogen and, P. G. ASHMORE AND B. J. TYLER, 39
- interaction of ethylene dichloride and, with silver surfaces, ROBERT G. MEISENHEIMER AND J. NORTON WILSON, 151

## P

- Palladium catalysts. Determination of the free-metal surface area of, J. J. F. SCHOLTEN AND A. VAN MONTFOORT, 85
- Particle size determination of supported catalytic metals; platinum on silica gel, C. R. ADAMS *et al.*, 336
- Pentacyanocobaltats (II) Ion, reactions of. II. Liquid phase hydrogenation and decomposition, B. DE VRIES, 489
- $\pi$ -bonded intermediates, *see* Metal films
- Platinum. Field-emission study of composite adsorption layers on tungsten and, W. J. M. ROOTSAERT *et al.*, 416
- Platinum on silica gel, *see* Metals, catalytic
- Poisoning of fixed catalyst beds, R. B. ANDERSON, 393
- Poisons, catalytic, effect on production of nickel hydride by electrolytic charging of nickel with hydrogen, H. JARMOLOWICZ AND M. SMIALOWSKI, 165

- Polar molecules. Nature of surfaces. I. Adsorption of lauric acid on aluminum oxides and hydroxides, J. H. DE BOER *et al.*, 1
- Polymerization of propylene on silica-alumina, F. E. SHEPHERD *et al.*, 379
- Polymethylcyclopentanes, *see* Metal films
- Pore volume and pore size distribution in alumina and silica gels. Control by addition of water soluble organic polymers, D. BASMADJIAN *et al.*, 547
- Promoting effect of chromium on a sprayed-nickel catalyst, DONALD N. FLETCHER AND HOWARD F. RASE, 389
- of cupric ions on the ferric ion catalyzed decomposition of hydrogen peroxide, MORDECHAI L. KREMER, 351
- Propylene, *see* Polymerization
- R**
- Radicals, cation, *see* Silica-alumina catalysts
- Reduction with hydrogen, *see* CuO
- S**
- Semiconductivity and catalytic activity. Dehydrogenation of isopropyl alcohol on ZnO-Cr<sub>2</sub>O<sub>3</sub> catalysts, JUAN F. GARCIA DE LA BANDA, 136
- Semiconductors. Hydrogen chemisorption and electrical conductivity of zinc oxide, A. CIMINO *et al.*, 275
- Silica-alumina. Oxidation of aromatic hydrocarbons by, D. M. BROUWER, 372
- Silica-alumina catalysts. The formation of cation radicals on the surface of, W. KEITH HALL, 53
- polymerization of propylene on, F. E. SHEPHERD *et al.*, 379
- Silica-alumina surfaces. I. Thermodynamics of adsorption of ammonia, ALFRED CLARK *et al.*, 244
- Silica and silica-alumina. Induction of catalytic activity by neutron irradiation of, R. J. MIKOVSKY AND P. B. WEISZ, 345
- Silver surfaces. Interaction of oxygen and of ethylene dichloride with, ROBERT G. MEISENHEIMER AND J. NORTON WILSON, 151
- Solid phase reactions, catalysis of. Effect of doping of cupric oxide catalyst on the thermal decomposition and explosion of ammonium perchlorate, F. SOLYMOSI AND E. KRIX, 468
- Stoichiometric number, significance and experimental determination, JURO HORIUTI, 199
- Structure and properties of evaporated metal films, J. R. ANDERSON *et al.*, 443
- Surface area of palladium catalysts. Determination of the free-metal, J. J. F. SCHOLTEN AND A. VAN MONTFOORT, 85
- Surface potential measurements on nickel and iron films during the chemisorption of ammonia, nitrogen, and hydrogen, P. M. GUNDRY *et al.*, 363
- T**
- Thermodynamics of adsorption of ammonia. The nature of silica-alumina surfaces. I., ALFRED CLARK *et al.*, 244
- Tungsten and platinum. Field-emission study of composite adsorption layers on, W. J. M. ROOTSAERT *et al.*, 416
- Tungsten. Successive adsorption of gases on. Nitrogen and carbon monoxide at room temperature, F. RICCA *et al.*, 458
- X**
- Xanthine oxidase, *see* 2-Chloropurine
- Z**
- Zeolites. Catalysis by crystalline aluminosilicates. I. Cracking of hydrocarbon types over sodium and calcium "X", V. J. FRILETTE *et al.*, 301
- ZnO-Cr<sub>2</sub>O<sub>3</sub> catalysts, dehydrogenation of isopropyl alcohol on. Semiconductivity and catalytic activity, JUAN F. GARCIA DE LA BANDA, 136
- Zinc oxide semiconductors. Hydrogen chemisorption and electrical conductivity of, A. CIMINO *et al.*, 275
- Zinc oxide. Infrared spectrum of hydrogen chemisorbed on, R. P. EISCHENS, W. A. PLISKIN, AND M. J. D. LOW, 180
- irradiated. Conversion of isopropyl alcohol to acetone on, JOSEPH C. KURIAKOSE AND M. CLARE MARKHAM, 498
