

Cumulative Subject Index¹

Volumes 36-40

A

- Acetic acid
 elimination from 2-butylacetate-3-*d*₁ over phosphate catalysts, **38**, 264
- Acetone
 from propylene oxyhydration, **38**, 11
- (Acetonitrile) pentacarbonyltungsten
 catalytic component for olefin metathesis, **38**, 482
- Acetoxylation
 propylene over palladium metal and salts, **39**, 294
- Acetylene
 decomposition on
 nickel, kinetics, **37**, 267
 platinum-iron, **37**, 101
 hydrogenation on sulfurated nickel, **40**, 94, 101
- Acid-base
 catalysis, carboxylic acid decomposition, **38**, 494
 catalysts, characterization by calorimetric titration, **38**, 312, 326
 properties
 MoO₃-Bi₂O₃-P₂O₅ catalysts, **40**, 203
 SnO₂-MoO₃ and SnO₂-P₂O₅ systems, **40**, 327
 SnO₂-V₂O₅ system, **40**, 318
- Acidity
 butylamine vapor titration of, **39**, 87
 heated nickel sulfate, **38**, 516
 L zeolites, **40**, 52
 type A zeolite, **38**, 498
 Y zeolite, **39**, 155
- Acrolein
 from propene oxidation, **37**, 215, 223
- Activation
 Pt-Au catalyst, by oxygen, **37**, 311
- Activation energy
 catalytic cracking
 formation of gasoline, **37**, 348
 formation of primary minor products, **37**, 348
 chemisorption, hydrocarbons on H-mordenite, **36**, 327
 cinnamate hydrogenation catalyzed by
 Co(CN)₅H³⁺, **38**, 418
 desorption, **36**, 159
 of desorption, oxygen from transition metal oxides, **37**, 44
 gasoline
 formation, **37**, 358
 re cracking, **37**, 358
- Active centers
 ethylene polymerization over chromium, **39**, 363
 Mo(V)/Mo(VI), **39**, 161
- Active sites
 γ-alumina, **38**, 179
- bis-molybdenyl species, **38**, 1
 nature
 electron donating property, **38**, 172
 surface acidity, **38**, 172
 reduced heteropolyacids and Mo₄O₁₀(OH)₂, **38**, 11
 on TiO₂ and TiO₂-SiO₂, nature of, **38**, 172
- Adsorbed species
 identification, benzene hydrogenation over
 Pt/Al₂O₃, **37**, 22
¹⁷O labeled, on V₂O₅ on silica, **37**, 279
 on silver during ethylene oxidation, **38**, 440
- Adsorption
 amines on alumina, **38**, 385
 benzene on Pt, **37**, 22
 benzene-¹⁴C on Raney nickel, **38**, 110
 carbon monoxide on palladium, **36**, 338
 comparison with catalysis on zeolites, **40**, 160
 heats of
 amines on alumina, **38**, 385
 heterogeneous surfaces, **37**, 232
 hydrogen on Pt, **38**, 245
 Na_xH_{1-x}Y zeolites, **36**, 371
 sulfur dioxide on silica gel, **38**, 206
³H on nickel plate, **39**, 456
 hydrogen
 atoms on support oxides, spillover, **40**, 190
 on alumina-supported platinum, **37**, 376
 on metal films: CO on Pd, **40**, 249
 nitric oxide on cobalt-silica, **38**, 238
 nitrogen oxides on iron oxides, **40**, 342
 oxygen on
 platinum, **36**, 211
 red lead, **36**, 74
 pyridine on solid acids, **36**, 1
 rate constants, sulfur dioxide on silica gel, **38**, 206
 sulfur dioxide on silica gel, **38**, 206
 toluene over zinc oxide, **38**, 491
 water, pyridine, ammonia and hydrocarbons on
 cation-exchanged zeolites, **40**, 61
 zinc oxide-water vapor system, electrical conductivity studies, **36**, 111
- Adsorption isotherms
 equations, for heterogeneous surfaces, **37**, 232
 pulse chromatograph technique, **38**, 385
- Aerosil
 adsorbed complexes, NMR studies, **39**, 205
 adsorbed species on, long-chain esters, **39**, 173
- Aggregation
 palladium, effects of, **37**, 297
- Aging
 catalyst, effect on product distribution, **36**, 313

¹ Boldface numbers indicate appropriate volume; lightface numbers indicate pagination.

- supported metals, pore size effect on, 37, 416
- Alcohols
 - decomposition over polynaphthoquinone with Lewis acids, 37, 148
 - dehydration
 - correlation with acidity–basicity distributions, 38, 312, 326
 - over liquid indium, 37, 133
 - over molten metal, 36, 276
 - over nickel–silica, silica–alumina, and nickel–silica–alumina, 38, 423
 - orthogonal collocation method, 38, 283
 - secondary, dehydrogenation on chromia, 40, 34, 40, 46
- Alkali metal
 - salts, promotion of ruthenium catalysts, 38, 394
- Alkali metal–carbon
 - catalyst, ESR spectra, 38, 189
- Alkanes
 - reactions on Pt–Au alloys, 38, 273
- Alkene ion radicals
 - conformational changes, 36, 238
- Allotropic conversion reaction
 - hydrogen, zinc oxide, 36, 199
- Alloys
 - copper–nickel, Auger electron spectroscopy, 36, 114
 - copper/nickel/silica, alloy formation, 37, 424
 - formation, Cu–Ni on silica, magnetostatic method, 39, 234
 - highly dispersed, 37, 106
 - palladium–gold, alumina support, 37, 311
 - phases (Ni_3Sn_4 , Ni_3Sn_2 , NiSn) on Ni–Sn catalysts, 38, 128
 - platinum–gold
 - alkane reactions, selectivity, 38, 273
 - alumina support, 37, 311
 - regular solution theory, 37, 106
 - supported palladium–silver, 37, 548
 - surface segregation, 37, 106, 114
- π -Allyl mechanism
 - modified: 1,5-cyclooctadiene isomerization over transition metal complexes, 39, 375
- Allyl radicals
 - mass spectrometry, 37, 540
- Alumina
 - amine adsorption, 38, 385
 - catalysis, butene isomerization, 37, 91
 - catalyst, modified with alkali-metal chlorides, 36, 385
 - Co–Mo– Al_2O_3 catalyst system, electron spectroscopy, 40, 137
 - matrix, Pt crystallite size and dispersion, 40, 379
 - platinum on
 - benzene hydrogenation, 37, 22
 - particle growth, 38, 510
 - preparation by anodization, 40, 117
 - propylene–ethylene codimerization over, 37, 142
 - pyridine adsorption, uv spectra, 36, 1
 - substrates with cylindrical parallel pores, preparation, 40, 117
 - support for Ni, morphology, 40, 1
 - γ -Alumina
 - active sites, 38, 179
 - Alumina–molybdic acid complexes
 - stable at surface of $\text{MoO}_3 \cdot \text{Al}_2\text{O}_3$ systems, 36, 81
- Aluminum
 - ions, as active sites on γ -alumina, 38, 179
 - Raney nickel magnetic properties, effect, 38, 231
 - removal from zeolite Y, 37, 186
- Amines
 - adsorption on alumina, 38, 385
 - dehydrogenation over molten metal, 36, 276
- Amino acids
 - Pt-catalyzed deuterium exchange, 39, 53
- Ammonia
 - adsorption on boron phosphate, 39, 419
 - catalytic oxidation, kinetics and mechanism, 39, 57
 - decomposition on polycrystalline iridium foil, 39, 471
 - formation in NO reduction, 38, 80
 - interaction with iridium foil, 39, 471
 - oxidation
 - over copper zeolites, 37, 258
 - over molybdenum, 40, 312
 - on Pt, Rh and Pd, kinetics, 40, 212
 - regularities in catalytic behavior of oxides, 39, 513
 - synthesis
 - potassium promoter in iron–alumina catalysts, 38, 120
 - structure sensitivity, 37, 503
 - turnover number, effect of iron particle size, 37, 513
- Ammonium exchanged erionite
 - thermochemical properties, 38, 461
- Ammonium Y molecular sieve
 - proton affinity, NMR study, 38, 358
- Ammonoxidation
 - olefins over tin–vanadium–phosphorus oxide, kinetics, 38, 257
- Anatase
 - morphology, size, 37, 57
- Anion radicals
 - nitrobenzene, 38, 172
 - SO_2^- and SO^- on supported vanadium silica gel catalysts, 37, 387
- Antimony oxide
 - Sb_2O_4 , propene oxidation, 37, 215
- Aromatic protons
 - deuteration, 39, 53
- Aromatics
 - selective hydrogenation, 38, 518
- Attrition milling
 - high-surface-area silica catalysts, preparation, 38, 73

- Auger electron spectroscopy
 copper-nickel alloys, **36**, 114
 electroless nickel films on Pd nuclei, **37**, 251
 formic acid decomposition over carburized and graphitized Ni(110), **38**, 402
 nickel sulfides, **40**, 94
 palladium–alumina hydrogenation catalyst, iron poisoning, **38**, 218
 PbSO₄ and Na₄P₂O₇ identification on Pt and Pd, **40**, 108
- Auto exhaust
 oxidation catalysts, CuO and CuCr₂O₄, **39**, 104
 Pt catalyst, effect of Cu, **38**, 166
 treatment: nitrogen formation in NH₃ oxidation, **40**, 312
- Automotive converters
 platinum alumina catalysts, pore structure, **37**, 127
- B**
- Benzaldehyde
 oxidation over transition metal complexes, **36**, 93
- Benzene
 adsorption on Pt, **37**, 22
 exchange with deuterium
 over NiX and NiY, **40**, 67
 sensitivity to sulfur poisons, **37**, 324
 hydrocracking with palladium on silica–alumina catalysts, **36**, 313
 hydrogenation
 on nickel–silica, **37**, 37
 on platinum–palladium, **38**, 47
 on Pt, **37**, 22
 sensitivity to sulfur poisons, **37**, 324
 from propene oxidation, **37**, 215, 223
 vaporization, determination of zeolite contents, **38**, 307
- Benzene-¹⁴C
 adsorption and hydrogenation on Raney nickel, **38**, 110
- Benzeneazodiphenylamine
 desorption rate, **36**, 356
- cis*-Bicyclo[3.3.0]oct-2-ene
 isomerization over transition metal complexes, **39**, 375
- Bifunctional catalysis
 by platinum-containing sulfonic acid resin, **38**, 505
- Bimetallic catalysts
 platinum–palladium activity, dispersion measurements, **38**, 47
- Bimetallic reforming catalyst
 dehydrogenation activity, **37**, 553
- Bismuth
 MoO₃–Bi₂O₃–P₂O₅ catalysts, acid-base properties, **40**, 203
- Bismuth iron molybdates
 catalysts, structure determination, **40**, 19
 system, physicochemical properties, **39**, 286
- Bismuth molybdates
 catalysts, reduction–reoxidation, **39**, 22
 labeled, reduction, **36**, 240
- propene oxidation over, **37**, 223
 silica support, propylene oxidation, **39**, 141
 toluene oxidation, **39**, 437
 X-ray photoelectron spectroscopy, **37**, 174
- Bismuth oxide
 Bi₂O₃, propene oxidation, **37**, 215
- Boehmite
 formation from gibbsite, **36**, 99
- Bond energy
 metal–oxygen, in oxide catalysts, **38**, 525
- Boron phosphate
 ammonia adsorption, **39**, 419
- Boundary layer theory
 surface coverage calculation, **36**, 327
- 1-Bromo-2-methylpropane
 dehydrohalogenation on alumina, **36**, 385
- Brønsted acid centers
 strength in NaHY zeolites, **37**, 383
- Butadiene
 hydrogenation
 over nickel phosphide, **40**, 166
 on silica-supported nickel, **37**, 332
 oxidation in gas phase on
 SnO₂–MoO₃ and SnO₂–P₂O₅ systems, **40**, 327
 SnO₂–V₂O₅, **40**, 318
- Butene
 isomerization over
 alumina, **37**, 91
 γ-alumina, **38**, 179
 cobalt X zeolites, **38**, 366
 Co₃O₄, **37**, 558
 sulfurated nickel, **40**, 101
 titanium dioxide, **38**, 172
 oxidation in gas phase on
 SnO₂–MoO₃ and SnO₂–P₂O₅ systems, **40**, 327
 SnO₂–V₂O₅, **40**, 318
 oxidative dehydrogenation over ferrite catalysts, **39**, 36
- 1-Butene
 hydrogenation on silica-supported nickel, **37**, 332
 isomerization over decaionized type A zeolite, **39**, 1
 nature of chemical activation, **38**, 214
- 2-Butylacetate-3-*d*₁
 acetic acid elimination from, **38**, 264
- Butylamine
 vapor, titration of trisodium hydrogen disulfate surface acidity, **39**, 87
- n*-Butylamine titration
 titration method, surface acidity measurement, **36**, 356
- n*-Butylbenzene
 hydrocracking with palladium on silica–alumina catalysts, **36**, 313
- sec*-Butylbenzene
 hydrocracking with palladium on silica–alumina catalysts, **36**, 313
- γ-Butyrolactone
 ring transformation of, **37**, 166

C

- Calcium oxide
2-propanol decomposition over, **39**, 225
- Calorimetric titration
acidity–basicity distributions, alcohol dehydration
correlation, **38**, 312, 326
- Calorimetry
of adsorption, data treatment, **38**, 245
- Carbon
active, catalyst for H₂S oxidation, **37**, 287
deposits on nickel catalysts
reaction with hydrogen, **40**, 154
reaction with steam, **40**, 154
formation on nickel, **37**, 267
from platinum–iron/acetylene, **37**, 101
- Carbon dioxide
inhibitor of polymerization on nickel and cobalt
films, **37**, 391
- Carbon dioxide–hydrogen
reactions on group VIII metals, product distribu-
tions, **37**, 449
- Carbon monoxide
adsorbed on Pd, kinetics of reaction with oxygen,
40, 334
adsorption on palladium, **36**, 338; **40**, 249
catalytic oxidation, **37**, 57
chemisorption on silica-supported palladium–silver
alloys, **37**, 548
hydrogenation, steady-state rate on Ru, Ni and Re,
40, 173
interaction with hydrogen on Ni, **38**, 153
in NO reduction over ruthenium, **38**, 80
methanation over nickel/alumina, **40**, 281
nitric oxide reduction on copper, **40**, 301
oxidation
over metal oxides, kinetics, **36**, 266
over metal oxides, SO₂ effects, **39**, 104
by O₂ and NO over Ag and Au, **37**, 531
on palladium, mechanism and kinetics, **39**, 265,
277
over palladium, by O₂, **36**, 185
on Pt (111), **40**, 268
on platinum, transient kinetics, **38**, 335
on Pyrex glass, kinetics, **38**, 508
on red lead (Pb₃O₄), transient behavior, **36**, 74
on supported Pt, **39**, 29
reactions with
H₂ over supported Pt and Pd, **40**, 129
N₂O over SnO₂, **39**, 412
temperature-programmed desorption from sup-
ported cobalt, **38**, 477
titration
metal dispersion measurement, **36**, 247
supported Pt catalysts, **36**, 244
- Carbonylation
methanol, **40**, 255
- Carboxylic acids
decomposition, acid–base catalysis, **38**, 494
- Catalysis
comparison with adsorption on zeolites, **40**, 160
diffusion and desorption limitation **39**, 303
by molten metals, kinetic isotope effects, **37**, 133
- Catalyst
metal complex, poisoning by sulfur compounds, **39**,
190
O₂ pretreatment, **39**, 303
polymer gel entrapped, **38**, 435
reaction in single particle of, **39**, 303
reduced, solid-state properties, **37**, 204
sample preparation, four techniques, **39**, 91
supported, optimal metal-particle size, **39**, 148
- Catalyst redox
of SnO₂ during CO–N₂O reaction, **39**, 412
- Catalyst selectivity
control by Lewis acids, **37**, 148
surface carbon, formic acid decomposition over
carburized Ni(110), **38**, 402
- Catalytic activity
in ammonia oxidation, **39**, 73
copper–nickel alloys, **37**, 114
L zeolites, **40**, 52
polynaphthoquinone, control by Lewis acids, **37**,
148
- Catalytic reactions
intermediate complexes, chemical calculations, **38**,
214
- Catalytic superactivity
formic acid decomposition on platinum, **36**, 224
- Cation-exchanged zeolites
adsorption of water, pyridine, ammonia and hydro-
carbons, **40**, 61
Mn²⁺ ions, ESR spectra, **40**, 135
type A, acidity and activity, effect, **38**, 498
- Charcoal
rhodium dispersion on, measurement by ESCA, **40**,
295
size distribution of platinum dispersed on, **39**, 125
- Charge
work function, cyclohexane chemisorption and de-
hydrogenation, **36**, 305
- Chemisorption
carbon monoxide on silica-supported palladium–
silver alloys, **37**, 548
cyclohexane on Pt(111), **36**, 305
hydrocarbon on zeolite, **36**, 238
hydrogen
and oxygen, ruthenium surface areas, **38**, 299
by platinum black, **36**, 291
kinetics, **36**, 262
olefins on transition metal films, ir studies, **37**, 391
on PtY zeolite, **39**, 334
water, electronic factors, **39**, 152
- Chlorine
catalytic reaction with nitric oxide over mordenite,
36, 58
reaction with nitric oxide over NH₄-Y zeolite, **37**,
555

- Chromia**
 amorphous conversion to α -Cr₂O₃, 36, 394
 dehydrogenation of alcohols, 40, 34, 40, 46
 effect of texture on oxidizing character, 36, 394, 404
 excess oxygen of, 36, 394, 404
 oxidation of, 36, 394
 reflectance and EPR spectra, 40, 46
 silica support, nitric oxide adsorption, 36, 142, 152
 surface properties and activity, 40, 40, 46
- Chromic oxide**
 cumene liquid phase oxidation, 39, 317
- Chromium**
 bivalent, in catalysts, 39, 363
 trivalent, in catalysts, 39, 363
- Chrysotile**
 pore size distribution
 mercury penetration, 36, 36
 nitrogen capillary condensation, 36, 36
 synthetic, pore size distribution
 from electron microscopy, 36, 23
 nitrogen capillary condensation, 36, 30
- Cinnamate**
 hydrogenation catalyzed by Co(CN)₅H³⁺, 38, 418
- Clusters**
 formation, platinum-palladium catalysts, 38, 47
 metal
 electronic properties, 37, 187
 ionization potentials and electron affinities, 37, 187; 39, 158
- Cobalt**
 Co-Mo-Al₂O₃ catalyst system, electron spectroscopy, 40, 137
 Co₃O₄ catalyst
 butene isomerization, 37, 558
 reactivity of preadsorbed hydrogen, 37, 561
 Co(II), supported: hydrocarbon complexation, NMR studies, 39, 205
 films, olefin chemisorption, 37, 391
 role in hydrodesulfurization catalysts, 38, 19
 support, CO temperature programmed desorption, 38, 477
- Cobalt ferrite**
 catalysts, butene oxidative dehydrogenation, 39, 36
- Cobalt molybdate**
 catalysts, hydrodesulfurization, 38, 19
- Cobalt oxide**
 doped with Al₂O₃
 poisoned catalytic activity, 40, 124
 surface enrichment of dopant, 40, 124
 doped with MgO, poisoned catalytic activity, 40, 124
- Cobalt-silica**
 nitric oxide adsorption, 38, 238
- Cobalt X zeolites**
 butene isomerization over, 38, 366
- Coking**
 cumene cracking on H-mordenite, 37, 158
 nickel catalysts by acetylene, 37, 267
- Collision desorption**
 molecules from solid surfaces, 36, 159
- Compensation effect**
 anatase particles, 37, 57
 methanation reaction, 37, 462
- Conversion**
 parahydrogen on nickel and nickel hydride, kinetics, 40, 184
 temperature effects on, 37, 120
- Copper**
 Cu(II) ions on silica, spectroscopic study, 40, 197
 Cu(II)NaY zeolites, ammonia oxidation, 37, 258
 Cu(II)-Y, cyclohexane oxidative dehydrogenation, 36, 361
 on magnesia, catalyst preparation, 39, 115
 NO reduction by CO on, 40, 301
 segregation to surface of Cu-Ni alloys, Auger electron spectroscopy, 36, 114
- Copper(II)-acetonitrile complex**
 catalyst, oxidative displacement polymerization of 2,4,6-tribromophenol, 36, 48
- Copper ferrite**
 catalysts, butene oxidative dehydrogenation, 39, 36
- Copper-nickel**
 alloys, ethane hydrogenolysis, 37, 114
 silica support, alloy formation, 37, 424
- Copper-nickel-silica**
 catalysts, alloy formation, magnetostatic method, 39, 234
- Copper oxide**
 catalyst, propylene oxide deoxidation, 37, 523
- Copper phthalocyanine**
 adsorption of H₂S and O₂, 39, 190
 2-propanol conversion to acetone, 39, 190
- Cracking**
 catalytic
 dewaxed neutral distillate, 37, 120
 neutral distillate, effect of temperature on product distribution, 37, 348
 neutral distillates, product identification, 37, 240
 n-hexane over attrition-milled silica, 38, 73
- Crosslinking**
 of ion exchange resins, influence on esterification rates, 39, 449
- Crystal field surface orbital-bond energy bond order**
 calculations for surface reactions, 40, 268
- Crystallite**
 size effects, activity and selectivity of Ag catalysts, 39, 395
- Crystal structure**
 PtY zeolite, 39, 334
- Cumene**
 cracking on H-mordenite, 37, 158

- liquid phase oxidation with Cr_2O_3 , MnO_2 and Fe_2O_3 catalysts, **39**, 317
- Cyclic olefins
from aromatics, **38**, 518
- 1,3-Cyclohexadiene
adsorption and dehydrogenation on Pt(111), **36**, 305
- Cyclohexane
chemisorption and dehydrogenation on Pt(111), **36**, 305
dehydrogenation over
nickel-tin-silica, **38**, 128
supported ruthenium, **38**, 394
reactions on Pt and Ni, **39**, 181
- Cyclohexanone
dehydrogenation over nickel-tin-silica, **38**, 128
- Cyclohexene
adsorption and dehydrogenation on Pt(111), **36**, 305
oxidation over manganese dioxide, **38**, 33
- Cyclohexylamine
dehydrogenation over nickel-tin-silica, **38**, 128
- 1,5-Cyclooctadiene
isomerization over transition metal complexes, **39**, 375
- Cylindrical parallel pores
alumina substrates, preparation by anodization, **40**, 117

D

- Deactivation
alumina, **37**, 68
Pt-Au catalyst, by hydrogen, **37**, 311
- Decationization
type A zeolite, **39**, 1
- Dehydration
alcohols over nickel-silica, silica alumina and nickel-silica-alumina, **38**, 423
ethanol over attrition-milled silica, **38**, 73
formic acid on manganese(II) oxide, **39**, 369
isopropyl alcohol on
 $\text{SnO}_2\text{-MoO}_3$ and $\text{SnO}_2\text{-P}_2\text{O}_5$ systems, **40**, 327
 $\text{SnO}_2\text{-V}_2\text{O}_5$ system, **40**, 318
- Dehydrocyclization
alkanes on Pt-Au alloys, **38**, 273
n-hexane on Pt- Al_2O_3 , reaction mechanism, **40**, 349
- Dehydrogenation
activity of bimetallic reforming catalyst, **37**, 533
alcohols
on chromia, mechanism, **40**, 34, 40, 46
over molten metal, MO-treatment, **36**, 276
amines over molten metal, MO-treatment, **36**, 276
cyclohexane
on Pt(111), **36**, 305
over nickel-tin-silica, **38**, 128
over supported ruthenium, **38**, 394
cyclohexanone over nickel-tin-silica, **38**, 128
cyclohexylamine over nickel-tin-silica, **38**, 128
ethanol on magnesium oxide, mechanism, **38**, 101
formic acid on manganese(II) oxide, **39**, 369
isopropyl alcohol on
liquid indium, kinetics, **36**, 67
 $\text{SnO}_2\text{-MoO}_3$ and $\text{SnO}_2\text{-P}_2\text{O}_5$ systems, **40**, 327
 $\text{SnO}_2\text{-V}_2\text{O}_5$ system, **40**, 318
oxidative
cyclohexane over copper-zeolite, kinetics, **36**, 361
Mössbauer spectra of ferrite catalysts, **39**, 36
propanol over MgO, CaO and SrO, **39**, 225
2-propanol over nickel-tin-silica, **38**, 128
structure sensitive, 2,3-dimethylbutane over dispersed Pt, **39**, 125
- Dehydrogenation-hydrogenolysis
n-pentane on Ru- Al_2O_3 , **37**, 339
- Dehydrohalogenation
catalytic: on alumina, modified with alkali-metal chlorides, **36**, 385
- Demethylation
selective: hexanes on Pd-Au and Pt-Au, **37**, 311
- Deoxidation
propylene oxide on copper oxide, **37**, 523
- Desorption
activation energy, **36**, 159
collision, molecules from solid surfaces, **36**, 159
flash, formic acid decomposition over carburized and graphitized Ni(110), **38**, 402
kinetic, chemisorbed hydrocarbons on H-mordenite, **36**, 327
physisorbed indicator, **36**, 356
temperature-programmed
amines on alumina, **38**, 385
CO from supported cobalt, **38**, 477
nitric oxide adsorption on cobalt-silica, **38**, 238
thermal
hydrogen from Pt, **37**, 81
molecules from solid surfaces, **36**, 159
- Deuterium
conversion and exchange on zinc oxide, **36**, 199
exchange
of aromatic protons in proteins over Pt, **39**, 53
with benzene over NiX and NiY, **40**, 67
with cyclohexane over Pt and Ni, **39**, 181
hydrogen-water over nickel-chromia on alumina, **40**, 1, 11
tracer studies, olefin isomerization, **37**, 68
- Deuterium-neopentane
exchange in single catalyst particle, **39**, 303
- Dialkyl cyclohexenes
hydrogenation over transition metal, stereochemistry and mechanism, **40**, 372
- Diethyl ether
reactions on titanium, **36**, 235
- Differential scanning calorimetry
methanation of CO over nickel/alumina, **40**, 281

- Differential thermal analysis
 instrument, modified for pulsed thermo kinetic measurements, 37, 1
 MgMoO₄-MoO₃ catalysts, 39, 161
- Diffusion coefficient
 deuterium-neopentane exchange reaction, 39, 303
 Wicke-Kallenbach, 39, 303
- Diffusion kinetics
 first order: chemisorbed hydrocarbons on H-mordenite, 36, 327
- Diffusivity
 coked mordenite effective, 37, 158
- 2,3-Dimethylbutane
 dehydrogenation over dispersed Pt, 39, 125
- 2,3-Dimethyl-1-butene
 isomerization of, 37, 68
- 3,3-Dimethyl-1-butene
 isomerization over cobalt X zeolites, 38, 366
- Dimethylcyclohexenes
 hydrogenation over transition metal catalysts, 36, 333
- Dimethyl ether
 reactions on titanium, 36, 235
- Diolefins
 hydrogenation on palladium-alumina, iron poisoning, 38, 218
- Diphenylpicrylhydrazine
 oxidation on chromia, 36, 404
- Dispersion
 measurements of bimetallic catalysts, 38, 47
 Pt in alumina matrix, 40, 379
- Disproportionation
 propylene, 38, 1
- Double-bond
 isomerization in methyl 9-octadecenoates, mechanism, 38, 223
- Dual function catalysis
 differential heating, iron silica-alumina, 40, 86

E

- Edge-steps
 of slip band of nickel, activity, 39, 456

cis-E2, 38, 264
trans-E2, 38, 264
 stereomechanism, 38, 264
- Elovich equation
 chemisorption, kinetics, 36, 262
- Epoxidation
 fumaric acid, kinetics and mechanism, 39, 260
- Erbium oxide
 hydrogen-oxygen reaction on, 38, 54

- Esterification
ethyl acetate with 1-propanol in liquid and gas phase, **39**, 449
- Ethane
hydrogenolysis over copper–nickel alloys, **37**, 114
- Ethanol
dehydration over attrition-milled silica, **38**, 73
dehydrogenation on magnesium oxide, mechanism, **38**, 101
reactions on titanium, **36**, 235
- Ether
decomposition over silica–alumina, **38**, 423
formation over silica–alumina and nickel–silica, **38**, 423
- Ethoxide
intermediate, ethanol dehydrogenation on magnesium oxide, **38**, 101
- Ethylene
anodic oxidation at silver electrode, **38**, 294
chemisorption on transition metal films, **37**, 391
dimerization over Y zeolites, **36**, 320
hydrogenation
on alumina, **38**, 135
on Ni: induction by water synthesis, **36**, 379
pulsed thermo kinetic measurements, **37**, 8
on silica-supported nickel, **37**, 332
over zinc oxide, effect of electrodynamic field, **38**, 147
oxidation
ir spectra of adsorbed species, **38**, 440
over metal oxides, SO₂ effects, **39**, 104
over silver, effect of crystallite size, **39**, 395
over silver, mechanism, **40**, 356
polymerization over
chromium, **39**, 363
transition-metal exchanged Y zeolites, **36**, 320
- Exchange
benzene with deuterium, sensitivity to sulfur poisons, **37**, 324
- Extended Hückel molecular orbital
study, propylene acetoxylation over palladium metal and salts, **39**, 294

F

- Faujasite
structure, stability, **38**, 469
- Ferric oxide
cumene liquid phase oxidation, **39**, 317
- Ferrite
catalysts, Mössbauer spectra, **39**, 36
- Formic acid
decomposition on
carburiized and graphitized Ni(110), **38**, 402
manganese(II) oxide, selectivity, **39**, 369
platinum, **36**, 224

- Fouling
catalyst
bed, **37**, 287
pellets, **38**, 283
- Fumaric acid
epoxidation by hydrogen peroxide with sodium tungstate or molybdate, **39**, 260

G

- Garnirite
synthetic, pore size distribution from electron microscopy, **36**, 23
- Gasification
carbon deposits on nickel catalysts, **40**, 154
- Gas phase
reactions, catalyzed by Cu-phthalocyanine, **39**, 190
- Gasoline
selectivity, cracking of neutral distillate, **37**, 358
- Germanic faujasite
surface properties, **37**, 396
- Gibbsite
thermal decomposition, **36**, 99
- Gold
catalysis of CO + O₂ and CO + NO, **37**, 531
- Graphite
oxidation on silver, **36**, 413
- Group VIII metals
hydrocarbon synthesis over, **38**, 514
- Growth
palladium particles, in gases, **39**, 481

H

- Heterogeneous catalysis
topochemical, zinc sulfide with oxygen, **36**, 285
- Hexadiene
from propene oxidation, **37**, 215, 223
- n*-Hexane
cracking over attrition-milled silica, **38**, 73
dehydrocyclization on Pt–Al₂O₃, reaction mechanism, **40**, 349
reactions on Pt–Au alloys, **38**, 273
transformations on Pt-black, **39**, 403
- Hexanes
¹³C labeled, isomerization and hydrocracking, **37**, 311
- Hydrazine
decomposition on polycrystalline iridium foil, **39**, 471
interaction with iridium foil, **39**, 471
- Hydrocarbons
chemisorption
ir data, **36**, 251
on H-mordenite, **36**, 327
on zeolite, **36**, 238
oxidation
over metal oxides, kinetics, **36**, 266

- vanadium pentoxide-precious metal mixtures, 39, 432
- synthesis
- from CO-H₂ mixtures, 37, 449, 462

ammonium exchanged erionite, **38**, 461
benzene adsorption on Pt, **37**, 22
carbon monoxide adsorption on palladium, **36**, 338
chemisorbed alkenes, **37**, 332
cinnamate ion, **38**, 418
decationized type A zeolite, **39**, 1
ethylene oxidation over silver, **40**, 356
1-hexene adsorption on supported Ni and Pt, **36**, 251
hydrogen sulfide oxidation on A-type zeolites, **40**, 391
long-chain esters adsorbed on Aerosil, **39**, 173
MgMoO₄-MoO₃ catalysts, **39**, 161
nickel hydrogen Y zeolite, **38**, 351
nitric oxide absorption on
 chromia/silica, **36**, 142, 152
 cobalt-silica, **38**, 238
N₂O₂ on chromia/silica, **36**, 152
OH groups, in zeolites Na_xH_{1-x}Y, **36**, 371
olefin chemisorption on transition metal films, **37**, 391
 surface groups on silica, **40**, 236
 zeolites, cation-exchanged with different cations, **37**, 474
Intermediate complexes
 catalytic reactions, chemical calculations, **38**, 214
Internal reflection spectroscopy
 adsorbed molecules on metal films: CO on Pd, **40**, 249
Ion exchange
 zeolite, **36**, 125
Ion exchange resins
 solid catalysts, crosslinking and esterification rates, **39**, 449
Ionization potentials
 metal clusters, **37**, 187; **39**, 158
Ion scattering spectrometry
 surface enrichment, Al₂O₃ or MgO in Co₃O₄, **40**, 124
Iridium
 polycrystalline foil, hydrazine interaction with, **39**, 471
Iron
 catalysts
 nitrogen induced surface reconstruction, **37**, 513
 supported, reduction, **40**, 143
 magnesium oxide support
 effect of particle size, **37**, 503
 properties, **37**, 486
 poisoning, palladium-alumina catalyst, **38**, 218
Iron-alumina
 catalysts, potassium promoter for ammonia synthesis, **38**, 120
Iron antimonate
 propene oxidation, mechanism, **37**, 223
Iron films
 isomerization of olefins, **37**, 193
Iron oxide-chromium oxide
 pore size distribution
 mercury penetration, **36**, 36
 nitrogen capillary condensation, **36**, 36
Iron oxides
 Fe₂O₃, propene oxidation, **37**, 215
 nitrogen oxides, adsorption on, **40**, 342
Iron silica-alumina
 dual function catalysis, differential heating, **40**, 86
Isobutane
 ammoxidation over tin-vanadium-phosphorus oxide, **38**, 257
Isomerization
 alkanes on Pt-Au alloys, **38**, 273
 1-butene over decationized type A zeolite, **39**, 1
 butenes
 over alumina, **37**, 91
 over γ -alumina, **38**, 179
 on Co₃O₄, **37**, 558
 over titanium dioxide, **38**, 172
 ¹³C-labeled hexanes on alloys, **37**, 311
 cyclic and bond shift mechanisms, **37**, 311
 double bond, in methyl 9-octadecenoates, mechanism, **38**, 223
 n-hexane on platinum, **39**, 403
 olefins
 on alumina, **37**, 68
 on Mo-Bi-P oxides, **40**, 203
 in presence of C₃D₆ on iron, **37**, 193
 n-pentane, **36**, 125
 phenylcyclopropanes, by homogeneous rhodium, **39**, 198
 xylene over nickel hydrogen Y zeolite, **38**, 351
Isopropyl alcohol
 dehydration and dehydrogenation over
 SnO₂-MoO₃ and SnO₂-P₂O₅ systems, **40**, 327
 SnO₂-V₂O₅ system, **40**, 318
 dehydrogenation over liquid indium, kinetics, **36**, 67
Isotopic exchange reaction
 hydrogen, zinc oxide, **36**, 199
- K**
- Kelvin equation
 nitrogen capillary condensation
 classical, **36**, 30
 corrected according to Broekhoff-de Boer, **36**, 30
Kinetic desorption
 chemisorbed hydrocarbons on H-mordenite, **36**, 327
Kinetic isotope effects
 olefin isomerization, **37**, 68
 by pulse reactor, in dehydrogenation, **37**, 133

L

- Langmuir-Hinshelwood
model, catalyst fouling, **38**, 283

 powder, cyclohexane reactions, **39**, 181
 Raney
 benzene-¹⁴C adsorption and hydrogenation, **38**, 110
 dimethylcyclohexene hydrogenation, **36**, 333
 magnetic properties, influence of aluminum and hydrogen contents, **38**, 231
 methylcyclohexenol catalytic hydrogenation, **36**, 119
 silica support
 constitution, **38**, 485
 1-hexene adsorption, **36**, 251
 sulfurated, acetylene hydrogenation, **40**, 94, 101
 Nickel(II)
 complexes, NiBr₂(PBUⁿ)₂, catalyst, **39**, 375
 Nickel/alumina
 catalysts: CO methanation, **40**, 281
 Nickel-chromia
 alumina support, hydrogen-water deuterium exchange, **40**, 1, 11
 Nickel hydride
 intermediate, codimerization of styrene-olefins, **39**, 134
 thin films, parahydrogen conversion, **40**, 184
 Nickel orthophosphate
 reduction in hydrogen, catalytic activity, **40**, 166
 Nickelous hydroxide
 hexagonal platelets, preparation, **39**, 350
 Nickel oxide
 adsorbed species on, **39**, 350
 texture, development with temperature, **39**, 350
 Nickel phosphide
 butadiene hydrogenation over, **40**, 166
 Nickel-silica
 benzene hydrogenation, **37**, 37
 catalyst, alcohol dehydration, **38**, 423
 Nickel-silica-alumina
 catalyst, alcohol dehydration, **38**, 423
 Nickel sulfate
 heat treated, acidity, **38**, 516
 Nickel-tin-silica
 catalysts, dehydrogenation activity, **38**, 128
 Nitric oxide
 adsorption on
 cobalt-silica, ir and TPD studies, **38**, 238
 silica-supported chromia, ir spectra, **36**, 142, 152
 catalytic reaction with chlorine over mordenite, **36**, 58
 decomposition on Pt, **39**, 383
 reaction with chlorine over NH₄-Y zeolite, **37**, 555
 reduction
 by carbon monoxide on copper, **40**, 301
 by CO over Ag and Au, **37**, 531
 on Pt(III), **40**, 268
 over ruthenium, **38**, 80
 Nitrogen
 capillary condensation.
 pore size distribution of chrysotile, **36**, 30
 pore size distribution, comparison in chrysotile and zirconia, **36**, 36
 equilibration kinetics, on Ru-K, **38**, 430
 formation in NH₃ oxidation over molybdenum, **40**, 312
 Nitrogen oxides
 adsorption on iron oxides, **40**, 342
 Nitrous oxide
 interaction with thoria, luminescence, **40**, 286
 reduction with CO over SnO₂, **39**, 412
 Noncompensation effect
 anatase particles, **37**, 57
 Nonstoichiometry
 in finely divided NiO, **39**, 350
 Nonuniform catalyst
 mass transfer effects, **40**, 383
 Nuclear magnetic resonance
 high surface area silica-aluminas, **40**, 226
 molecular sieve Y, proton affinity, **38**, 358
 surface complexes with Co(II) and Ni(II), **39**, 205

Thermodesorption
oxygen from transition metal oxides, **37**, 44

Thianthrene
radical cations, ESR, **36**, 351

Thoria
interaction with N₂O, luminescence, **40**, 286

Tin
SnO₂, propene oxidation **37**, 215

Tin(IV) oxide
kinetics of CO-N₂O reaction over, **39**, 412

Titanium
reactions of methanol, ethanol, dimethyl and diethyl ethers on, **36**, 235

Titanium dioxide
active sites, butene isomerization, **38**, 172
anatase: morphology, size, **37**, 57
weight and magnetic susceptibility, effect of hydrogen reduction, **39**, 324

Titanium dioxide-silica
active sites, butene isomerization, **38**, 172

Toluene
adsorption over zinc oxide, **38**, 491
oxidation over
bismuth molybdate, **39**, 437
WO₃-MoO₃, **38**, 196

Transition metal
catalytic hydrogenation of methylcyclohexenols, **36**, 119
complexes, low-valent: benzaldehyde oxidation, **36**, 93
films, olefin chemisorption, **37**, 391

Transition metal oxides
oxygen thermodesorption, **37**, 44

Transmission electron microscope
technique comparison for catalyst particles, **39**, 91

2,4,6-Tribromophenol
polymerization with copper(II)-acetonitrile complex, **36**, 48

1,1,1-Trichloroethane
adsorption on uranium dioxide, **39**, 463

Trisodium hydrogen disulfate
surface acidity, **39**, 87

Tritium
behavior, produced by ⁶Li(n,α)³H in nickel plate, **39**, 456

Tungsten carbide
catalytically active, surface characterization, **39**, 298

Tungsten trioxide-molybdenum trioxide
catalysts, MoO₃ sublimation during toluene oxidation, **38**, 196

Turnover number
benzene hydrogenation, **37**, 22

U

Ultraviolet spectra
pyridine adsorption on solid acids, **36**, 1

Uranium dioxide
1,1,1-trichloroethane adsorption, **39**, 463

V

Vanadia
o-xylene oxidation over, **38**, 375

Vanadium
silica gel catalysts, SO₂⁻ and SO⁻ anion radicals, adsorption, **37**, 387

Vanadium pentoxide
reduction by hydrocarbons, precious metal promoters, **39**, 432
supported on silica, **37**, 279

Vanadium pentoxide-titanium dioxide
catalyst, *o*-xylene oxidation, **36**, 6

W

Water
chemisorption, electronic factors, **39**, 152

exchange with H₂ over supported Ni, **40**, 1, 11
 Wei-Prater analysis
 in pseudomonomolecular systems, **39**, 10

X

X-Ray diffraction
 ammonium exchanged erionite **38**, 461
 bimetallic catalysts, **38**, 47
 bismuth iron molybdate catalysts, structure determination, **40**, 19
 X-Ray photoelectron spectroscopy
 bismuth molybdates and multicomponent molybdates, **37**, 174
 graphite oxidation on silver, **36**, 413
 molybdenum oxides and supported molybdenum oxide catalysts, **36**, 11
 nitrogen oxides adsorbed on iron oxides, **40**, 342
 rhodium on charcoal catalyst, dispersion, **40**, 295
 Xylene
 isomerization over nickel hydrogen Y zeolite, **38**, 351
o-Xylene
 oxidation
 over vanadia, **38**, 375
 on V₂O₅-TiO₂, intermediates, **36**, 6
o-Xylene (methyl-¹⁴C)
 oxidation on V₂O₅-TiO₂, **36**, 6

Z

Zeolites
 A-type, hydrogen sulfide oxidation, **40**, 391
 catalyst, types: CrY, NiY, RhY, RuY, **36**, 320
 cation-exchanged
 ESR spectra, **40**, 61
 synthetic, Mn²⁺ ions, **40**, 135
 cobalt X, active centers, **38**, 366
 contents of zeolite catalysts, benzene vaporization, **38**, 307
 copper, ammonia oxidation, **37**, 258
 hydrocarbon chemisorption on, **36**, 238
 hydrogen X, crystallinity, **38**, 469
 hydrogen Y, catalytic active sites, **38**, 351
 L type, acidity, catalytic activity and thermal stability, **40**, 52

Na, K and Ca faujasite type: comparison of adsorption and catalysis, **40**, 160

NaX, pyridine adsorption, uv spectra, **36**, 1
 nickel hydrogen Y, catalytic activity, **38**, 351
 NiX

electronic spectra, **39**, 357
 and NiY, benzene-deuterium exchange, **40**, 67

PtY, location and dispersion of Pt, **39**, 334
 ring transformation on, **37**, 166
 sodium ammonium X, structural stability, **38**, 469

structure, ir spectra, **37**, 474
 transition-metal exchanged, **36**, 320
 type

A, acidity and activity, **38**, 498
 A, decationization, **39**, 1
 NaHY, strength of Brønsted acid centers, **37**, 383

Na_xH_{1-x}Y, sorption properties, **36**, 371
 NH₄-Y, catalytic reaction of nitric oxide and chlorine, **37**, 555

X, containing paramagnetic cations, parahydrogen conversion by, **38**, 489

Y, acidity, **39**, 155

Y type

aluminum removal from, **37**, 186
 iron-exchanged: reduction, **40**, 143

Zinc oxide

ethylene hydrogenation, effect of electrodynamic field, **38**, 147

hydrogen activation on, **36**, 199
 toluene adsorption over, **38**, 491

Zinc oxide-water vapor system

electrical conductivity studies, adsorption mechanism, **36**, 111

Zinc sulfide

topochemical heterogeneous catalysis with oxygen, **36**, 285

Zirconia

pore size distribution

mercury penetration, **36**, 36

nitrogen capillary condensation, **36**, 36

Zirconium phosphate

reductive aldol condensation with, **40**, 76
