Corrigendum

Corrigendum to “An insight into the Meerwein–Ponndorf–Verley reduction of α,β -unsaturated carbonyl compounds: Tuning the acid–base properties of modified zirconia catalysts” [J. Catal. 268 (2009) 79–88]

Francisco J. Urbano*, Rafael Romero, María A. Aramendía, Alberto Marinas, José M. Marinas

Department of Organic Chemistry, University of Córdoba, Campus de Rabanales, Marie Curie Building (Annex), E-14014 Córdoba, Spain

The authors have detected some errors in this article that should be corrected. The errors detected are described below:

1. Due to a misunderstanding, the name of Dr. Romero was omitted from the author line. The corrected author line appears above:

Francisco J. Urbano*, Rafael Romero, María A. Aramendía, Alberto Marinas and José M. Marinas.

2. Moreover, all through the text, the name for the catalyst containing alkaline-earth metals has the suffix N (for nitrate) whereas it should read C (for carbonate), as described in the first paragraph of section “2.1. Catalyst synthesis”.
