Victor D. Vacquier, Isolated Cortical Granules: A Model System for Studying Membrane Fusion and Calcium-Mediated Exocytosis, pages 27–35.

Volkmar Braun, Robert E. W. Hancock, Klaus Hantke, and Anton Hartmann, Functional Organization of the Outer Membrane of Escherichia Coli: Phage and Colicin Receptors as Components of Iron Uptake Systems, pages 37–58.

Through an unfortunate error, the Figure 5 in each of these papers was interchanged. It was corrected in most, but not all, copies of the issue. Figure 5 on page 32 should have a large digit 5 in the lower right corner. Figure 5 on page 46 should be a gel electrophoresis.
