

ANNOUNCEMENT

VOLUME 117 • NUMBER 1

Online publication from 2016

The *Journal of Cellular Biochemistry* will be published in online-only format effective with the 2016 volume. This is a proactive move towards reducing the environmental impact caused by the production and distribution of printed journal copies and will allow the journal to invest in further digital development. Published articles will continue to be disseminated quickly through the journal's broad network of indexing services, including ISI, MEDLINE and Scopus. Articles will also continue to be discoverable through popular search engines such as Google. All color images will now be reproduced digitally and published free of charge.

Early View

We are happy to announce that the *Journal of Cellular Biochemistry* is now part of the Wiley's Early View service. Articles will now be published on a regular basis online before inclusion in an issue. These articles are fully peer reviewed, edited and complete – they only lack page numbers and volume/issue details – and are considered fully published from the date they first appear online. This date is shown within the published article online. Because Early View articles are considered fully complete, please bear in mind that changes cannot be made to an article after the online publication date even if it is still yet to appear in a forthcoming issue.

The articles are available as full text HTML or PDF and can be cited as references by using their Digital Object Identifier (DOI) numbers. For more information on DOIs, please see <http://www.doi.org/faq.html>.

To view all the articles currently available, please visit the journal homepage on [http://onlinelibrary.wiley.com/journal/10.1002/\(ISSN\)1097-4644](http://onlinelibrary.wiley.com/journal/10.1002/(ISSN)1097-4644) and simply click on the “Early View” area at the top of the list of issues available to view. On final publication, the article will be removed from the Early View area and will appear instead in the relevant online issue, complete with page numbers and volume/issue details. No other changes will be made.

The implementation of Early View for the *Journal of Cellular Biochemistry* represents our commitment to get manuscripts available to view to the academic community as quickly as possible, reducing time to publication considerably without sacrificing quality or completeness.
