Cover: Susceptibility loci for PDB. Confirmed susceptibility loci identified by linkage or association are shown. The chromosomal locations are shown on the x-axis and the log₁₀ P-values for the genome wide significant hits are shown on the y-axis. Selected candidate genes for the candidate loci are indicated. Adapted from [Albagha et al., 2010, 2011]. See article by Vallet and Ralston on pages 289–299.
