

### Correction

In the article, "Heats of Mixing of Binary Mixtures of *N*-Methylpyrrolidone, Ethanolamine, *n*-Heptane, Cyclohexane, and Benzene by Differential Flow Calorimetry," by J.-L. Gustin and Henri Renon [*J. Chem. Eng. Data*, **18** (2), 164 (1973)], it was called to our attention by G. C. Benson that an exchange of component 1 with component 2 in the data of Larkin and McGlashan in Figure 1 produced an invalid figure in the original article. The corrected figure is shown here.
