Enthalpy of  $\text{NaAlCl}_4$ ,  $\text{KAlCl}_4$ , and Their Mixtures. Lucien Denielou,\* Jean-Pierre Petitot, and Christophe Tequi, *J. Chem. Eng. Data* **1982**, *27*, 129–32.

At the top of Table II (Experimental Measurements) it is necessary to read  $\Delta H_{\text{obsd}}$  instead of  $\Delta H_{\text{est}}$ .  $\Delta H_{\text{obsd}}$  is defined in the Glossary. All the enthalpy values reported in this table are experimental data.

Ultrasonic Velocities in Trialkyl Borates. Phoebus M. Christopher\* and Grover C. Davidson II, *J. Chem. Eng. Data* **1983**, *28*, 294–5.

The dimensions of  $A$ , the classical absorption coefficient, as given in Table III, should read  $\text{s}^2 \text{cm}^{-1}$ .

Measurements of Densities and Dielectric Constants of Liquid Isobutane from 120 to 300 K at Pressures to 35 MPa. William M. Haynes, *J. Chem. Eng. Data* **1983**, *28*, 367–9.

The correct spelling of the author's name is William M. Haynes.
