

Determination of Octanol–Air-Partition Coefficients (K_{OA}) of Fluorotelomer Acrylates, Perfluoroalkyl Sulfonamids, and Perfluoroalkylsulfonamido Ethanols. Annekatrin Dreyer, Vera Langer, and Ralf Ebinghaus, *J. Chem. Eng. Data* **2009**, *54*, 3022–3025.

On page 3023, the formulas in Table 1 are incorrect (*J. Chem. Eng. Data* **2009**, *54* (11), 3022–3025). The corrected table is below.

Table 1. Information on the Target Compounds^a

acronym	full compound name	formula	CAS	m/z TI
6:2 FTA	perfluorohexyl ethylacrylate	$C_{11}F_{13}H_7O_2$	17527-29-6	419
8:2 FTA	perfluorooctyl ethylacrylate	$C_{13}F_{17}H_7O_2$	27905-45-9	519
10:2 FTA	perfluorodecyl ethylacrylate	$C_{15}F_{21}H_7O_2$	17741-60-5	619
MeFOSA	<i>n</i> -methyl perfluorooctane sulfonamide	$C_8F_{17}SO_2NH(CH_3)$	31506-32-9	514
EtFOSA	<i>n</i> -ethyl perfluorooctane sulfonamide	$C_8F_{17}SO_2NH(CH_2CH_3)$	4151-50-2	528
MeFOSE	<i>n</i> -methyl perfluorooctane sulfonamidoethanol	$C_8F_{17}SO_2N(CH_3)CH_2CH_2OH$	24448-09-7	540
EtFOSE	<i>n</i> -ethyl perfluorooctane sulfonamido ethanol	$C_8F_{17}SO_2N(CH_2CH_3)CH_2CH_2OH$	1691-99-2	554

^a m/z TI: mass to charge ratio of the target ion determined by mass spectrometry. Details on supplier and purity can be found in the Supporting Information of the original document.

Acknowledgment

We thank Dr. Chirico of the Thermodynamics Research Center, National Institute of Standards and Technology, for pointing out this error.
